What are AWS managed policies?

An AWS managed policy is a standalone policy that is created and administered by AWS. AWS managed policies are designed to provide permissions for many common use cases. They make it easier for you to get started with assigning permissions to users, groups, and roles than if you had to write the policies yourself.

Keep in mind that AWS managed policies might not grant least-privilege permissions for your specific use cases because they are available for use by all AWS customers. We recommend that you reduce permissions further by defining [customer managed policies](#) that are specific to your use cases.

You cannot change the permissions defined in AWS managed policies. If AWS updates the permissions defined in an AWS managed policy, the update affects all principal identities (users, groups, and roles) that the policy is attached to. AWS is most likely to update an AWS managed policy when a new AWS service is launched or new API operations become available for existing services.

For more information, see [AWS managed policies](#) in the IAM User Guide.

Understanding policy reference pages

Each policy reference page includes the following information:

- **Using this policy** – Whether you can attach the policy to users, groups, and roles
- **Policy details**
 - **Type** – The type of AWS managed policy
 - **AWS managed policy** – A standard AWS managed policy
 - **Job function policy** – Policy that aligns with common industry job functions
 - **Service-linked role policy** – Policy that is attached to a service-linked role that allows a service to perform actions on your behalf, such as [the section called “AmazonRDSPreviewServiceRolePolicy”](#)
 - **Service role policy** – Policy designed to work with service roles, such as [the section called “AWSControlTowerServiceRolePolicy”](#)
- **Creation time** – When the policy was first created
- **Edited time** – When this version of the policy was edited

- **ARN** – The Amazon Resource Name of the policy
- **Policy version** – The version of the permissions granted by the policy
- **JSON policy document** – The policy JSON
- **Learn more** – Links to documentation related to AWS managed policies

Deprecated AWS managed policies

AWS regularly updates AWS managed policies. In most cases, we add permissions to a policy. This happens when we launch a new service or feature. To improve the security of AWS managed policies, we sometimes reduce the scope of policies. When we remove permissions from a policy, we set the policy to a *deprecated* state and make a new one available. When AWS deprecates a service or feature, we also deprecate the AWS managed policy for that feature.

If you receive an email notification that a policy you are using is deprecated, we recommend that you immediately take action. Identify the change to the policy and update your workflows. If AWS provides a replacement policy, plan to attach it to all affected identities (users, groups, and roles) and then detach the deprecated policy from those identities.

A deprecated policy has the following characteristics:

- It is removed from this guide.
- Permissions continue to work for all *currently* attached identities.
- In accounts where the policy is attached to an identity, it appears in the **Policies** list in the IAM console with a warning icon next to it.
- It *cannot* be attached to any new identities. If you detach it from a current identity, you cannot reattach it.
- After you detach it from all current entities, it is no longer visible.

AccessAnalyzerServiceRolePolicy

Description: Allow Access Analyzer to analyze resource metadata

AccessAnalyzerServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** December 02, 2019, 17:13 UTC
- **Edited time:** December 10, 2024, 16:51 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AccessAnalyzerServiceRolePolicy`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AdministratorAccess

Description: Provides full access to AWS services and resources.

AdministratorAccess is an [AWS managed policy](#).

Using this policy

You can attach AdministratorAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy

- **Creation time:** February 06, 2015, 18:39 UTC
- **Edited time:** February 06, 2015, 18:39 UTC
- **ARN:** arn:aws:iam::aws:policy/AdministratorAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "*",
      "Resource" : "*"
    }
  ]
}
```

AdministratorAccess-Amplify

Description: Grants account administrative permissions while explicitly allowing direct access to resources needed by Amplify applications.

AdministratorAccess-Amplify is an [AWS managed policy](#).

Using this policy

You can attach AdministratorAccess-Amplify to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** December 01, 2020, 19:03 UTC
- **Edited time:** April 04, 2024, 20:35 UTC
- **ARN:** arn:aws:iam::aws:policy/AdministratorAccess-Amplify

Policy version

Policy version: v12 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AdministratorAccess-AWSElasticBeanstalk

Description: Grants account administrative permissions. Explicitly allows developers and administrators to gain direct access to resources they need to manage AWS Elastic Beanstalk applications

AdministratorAccess-AWSElasticBeanstalk is an [AWS managed policy](#).

Using this policy

You can attach AdministratorAccess-AWSElasticBeanstalk to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** January 22, 2021, 19:36 UTC
- **Edited time:** December 11, 2024, 14:36 UTC
- **ARN:** arn:aws:iam::aws:policy/AdministratorAccess-AWSElasticBeanstalk

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AI0psAssistantPolicy

Description: Provides ReadOnly permissions required by the Amazon AI Operations Assistant to do analysis on customer AWS resources during investigations.

AI0psAssistantPolicy is an [AWS managed policy](#).

Using this policy

You can attach AI0psAssistantPolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** December 02, 2024, 16:21 UTC
- **Edited time:** December 02, 2024, 16:21 UTC
- **ARN:** arn:aws:iam::aws:policy/AI0psAssistantPolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AI0psConsoleAdminPolicy

Description: Grants full access to Amazon AI Operations service and its required permissions via AWS console. It also includes permissions to use identity-aware console sessions.

AI0psConsoleAdminPolicy is an [AWS managed policy](#).

Using this policy

You can attach AI0psConsoleAdminPolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** December 02, 2024, 23:51 UTC
- **Edited time:** December 02, 2024, 23:51 UTC
- **ARN:** `arn:aws:iam::aws:policy/AI0psConsoleAdminPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AlexaForBusinessFullAccess

Description: Grants full access to AlexaForBusiness resources and access to related AWS services

AlexaForBusinessFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AlexaForBusinessFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 30, 2017, 16:47 UTC
- **Edited time:** July 01, 2020, 21:01 UTC
- **ARN:** arn:aws:iam::aws:policy/AlexaForBusinessFullAccess

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "a4b:*",
        "kms:DescribeKey"
      ],
      "Resource" : "*"
    }
  ]
}
```

```

    },
    {
      "Action" : [
        "iam:CreateServiceLinkedRole"
      ],
      "Effect" : "Allow",
      "Resource" : "*",
      "Condition" : {
        "StringLike" : {
          "iam:AWSServiceName" : [
            "*a4b.amazonaws.com"
          ]
        }
      }
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "iam:DeleteServiceLinkedRole",
        "iam:GetServiceLinkedRoleDeletionStatus"
      ],
      "Resource" : "arn:aws:iam::*:role/aws-service-role/*a4b.amazonaws.com/
AWSServiceRoleForAlexaForBusiness*"
    },
    {
      "Effect" : "Allow",
      "Action" : [

AmazonAppStreamFullAccess

Description: Provides full access to Amazon AppStream via the AWS Management Console.

AmazonAppStreamFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonAppStreamFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** February 06, 2015, 18:40 UTC
- **Edited time:** August 28, 2020, 17:24 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonAppStreamFullAccess

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonBraketFullAccess

Description: Provides full access to Amazon Braket via the AWS Management Console and SDK. Also provides access to related services (e.g., S3, logs).

AmazonBraketFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonBraketFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** August 06, 2020, 20:12 UTC
- **Edited time:** April 19, 2023, 16:25 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonBraketFullAccess

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonBraketJobsExecutionPolicy

Description: Grants access to AWS services and resources necessary for executing an Amazon Braket Job including S3, Cloudwatch, IAM and Braket

AmazonBraketJobsExecutionPolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonBraketJobsExecutionPolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 26, 2021, 19:34 UTC
- **Edited time:** November 28, 2021, 05:34 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonBraketJobsExecutionPolicy

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonBraketServiceRolePolicy

Description: Allows Amazon Braket to create and manage AWS resources on your behalf

AmazonBraketServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** August 04, 2020, 17:12 UTC
- **Edited time:** August 06, 2020, 20:10 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonBraketServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:PutObject",
        "s3:GetObject",
        "s3:ListBucket"
      ],
      "Resource" : "arn:aws:s3:::amazon-braket-*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
```

```
        "logs:PutLogEvents",
        "logs:CreateLogStream",
        "logs:DescribeLogStreams",
        "logs:CreateLogGroup",
        "logs:DescribeLogGroups"
    ],
    "Resource" : "arn:aws:logs:*:*:log-group:/aws/braket:*"
}

AmazonChimeUserManagement

Description: Provides user management access to Amazon Chime Admin Console via the AWS Management Console.

AmazonChimeUserManagement is an [AWS managed policy](#).

Using this policy

You can attach AmazonChimeUserManagement to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 01, 2017, 22:17 UTC
- **Edited time:** February 18, 2020, 19:26 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonChimeUserManagement`

Policy version

Policy version: v8 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonChimeVoiceConnectorServiceLinkedRolePolicy

Description: Managed policy for Service Linked Role for Amazon Chime VoiceConnector

AmazonChimeVoiceConnectorServiceLinkedRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** September 30, 2019, 22:16 UTC
- **Edited time:** April 14, 2023, 21:49 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonChimeVoiceConnectorServiceLinkedRolePolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonCognitoIdpServiceRolePolicy

Description: Enables access to AWS services and Resources used or managed by Amazon Cognito User Pools

AmazonCognitoIdpServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy

- **Creation time:** June 26, 2020, 22:30 UTC
- **Edited time:** June 26, 2020, 22:30 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonCognitoIdpServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "cognito-idp:Describe*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonCognitoUnAuthedIdentitiesSessionPolicy

Description: This policy defines the set of permissions allowed for unauthenticated identities for Cognito Identity Pools. This policy is not intended to be used as a stand alone permission policy. It is used as a guardrail against overly permissive policies attached for roles in an identity pool. Do not attach this policy to any roles, as Cognito Identity Service will automatically include it as a scoped down policy when creating credentials. The privileges to temporarily access other AWS resources through the enhanced flow will now be defined by the intersection of the role associated with the identity of the unauthenticated user provided by a service, and the privileges given in this managed policy that is owned by Cognito.

AmazonCognitoUnAuthedIdentitiesSessionPolicy is an [AWS managed policy](#).

Using this policy

You can attach `AmazonCognitoUnAuthedIdentitiesSessionPolicy` to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** July 19, 2023, 23:04 UTC
- **Edited time:** November 01, 2024, 18:12 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonCognitoUnAuthedIdentitiesSessionPolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonConnectSynchronizationServiceRolePolicy

Description: Allows Amazon Connect to synchronize AWS resources across regions on your behalf.

AmazonConnectSynchronizationServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** October 27, 2023, 22:38 UTC
- **Edited time:** November 12, 2024, 22:22 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonConnectSynchronizationServiceRolePolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonConnectVoiceIDFullAccess

Description: Provides full access to Amazon Connect Voice ID

AmazonConnectVoiceIDFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonConnectVoiceIDFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 26, 2021, 19:04 UTC
- **Edited time:** September 26, 2021, 19:04 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonConnectVoiceIDFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonDataZoneEnvironmentRolePermissionsBoundary

Description: Amazon DataZone creates IAM roles for Environments to perform data analytics actions, and uses this policy when creating these roles to define the boundary of their permissions.

AmazonDataZoneEnvironmentRolePermissionsBoundary is an [AWS managed policy](#).

Using this policy

You can attach AmazonDataZoneEnvironmentRolePermissionsBoundary to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 11, 2023, 23:38 UTC
- **Edited time:** November 17, 2023, 23:29 UTC
- **ARN:** arn:aws:iam::aws:policy/
AmazonDataZoneEnvironmentRolePermissionsBoundary

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneFullAccess

Description: Provides full access to Amazon DataZone via the AWS Management Console as well as limited access to related services that are required by it.

AmazonDataZoneFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonDataZoneFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 22, 2023, 20:06 UTC
- **Edited time:** November 21, 2024, 20:36 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonDataZoneFullAccess

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneFullUserAccess

Description: Provides full access to Amazon DataZone, but does not allow the management of domains, users, or associated accounts.

AmazonDataZoneFullUserAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonDataZoneFullUserAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 22, 2023, 21:06 UTC
- **Edited time:** November 19, 2024, 21:38 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonDataZoneFullUserAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonDataZonePortalFullAccessPolicy

Description: Provides full access to Amazon DataZone APIs

AmazonDataZonePortalFullAccessPolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonDataZonePortalFullAccessPolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** March 26, 2023, 18:24 UTC
- **Edited time:** March 26, 2023, 18:24 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonDataZonePortalFullAccessPolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
```

```
"Statement" : [  
  {  
    "Effect" : "Allow",  
    "Action" : "datazonecontrol:*",  
    "Resource" : "*"   
  }  
]  
}
```

AmazonDataZoneProjectDeploymentPermissionsBoundary

Description: Amazon DataZone creates IAM roles that it uses for deploying data analytics projects. DataZone uses this policy when creating these roles to define the boundary of their permissions.

AmazonDataZoneProjectDeploymentPermissionsBoundary is an [AWS managed policy](#).

Using this policy

You can attach AmazonDataZoneProjectDeploymentPermissionsBoundary to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** March 21, 2023, 02:54 UTC
- **Edited time:** April 04, 2023, 02:48 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonDataZoneProjectDeploymentPermissionsBoundary

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneRedshiftGlueProvisioningPolicy

Description: Amazon DataZone is a data management service that enables you to catalog, discover, govern, share, and analyze your data. With Amazon DataZone, you can share and access your data across accounts and supported regions. Amazon DataZone simplifies your experience across AWS services, including, but not limited to, Amazon Redshift, Amazon Athena, AWS Glue, and AWS Lake Formation.

AmazonDataZoneRedshiftGlueProvisioningPolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonDataZoneRedshiftGlueProvisioningPolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 22, 2023, 20:19 UTC
- **Edited time:** October 23, 2024, 18:29 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonDataZoneRedshiftGlueProvisioningPolicy

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneRedshiftManageAccessRolePolicy

Description: This policy gives Amazon DataZone permissions to publish Amazon Redshift data to the catalog. It also gives Amazon DataZone permissions to grant access or revoke access to Amazon Redshift or Amazon Redshift Serverless published assets in the catalog.

AmazonDataZoneRedshiftManageAccessRolePolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonDataZoneRedshiftManageAccessRolePolicy to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** September 22, 2023, 20:15 UTC
- **Edited time:** November 16, 2023, 22:04 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmazonDataZoneRedshiftManageAccessRolePolicy

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneSageMakerManageAccessRolePolicy

Description: The AmazonDataZoneSageMakerManageAccessRolePolicy policy grants Amazon DataZone the permissions required to grant user access to various resources in the SageMaker environment.

AmazonDataZoneSageMakerManageAccessRolePolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonDataZoneSageMakerManageAccessRolePolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** April 23, 2024, 23:34 UTC
- **Edited time:** November 21, 2024, 20:21 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonDataZoneSageMakerManageAccessRolePolicy

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDetectiveFullAccess

Description: Provides full access to Amazon Detective service and scoped access to the console UI dependencies

AmazonDetectiveFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonDetectiveFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** April 30, 2020, 17:57 UTC
- **Edited time:** May 17, 2023, 19:39 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonDetectiveFullAccess

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "detective:*",
        "organizations:DescribeOrganization",
        "organizations:ListAccounts"
      ],
      "Resource" : "*"
    }
  ]
}
```

```
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "guardduty:ArchiveFindings"
      ],
      "Resource" : "arn:aws:guardduty:*:*:detector/*"
    },
    {

AmazonDevOpsGuruServiceRolePolicy

Description: A service-linked role required for Amazon DevOpsGuru to access your resources.

AmazonDevOpsGuruServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** December 01, 2020, 10:24 UTC
- **Edited time:** January 10, 2023, 14:36 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonDevOpsGuruServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonDMSRedshiftS3Role

Description: Provides access to manage S3 settings for Redshift endpoints for DMS.

AmazonDMSRedshiftS3Role is an [AWS managed policy](#).

Using this policy

You can attach `AmazonDMSRedshiftS3Role` to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** April 20, 2016, 17:05 UTC
- **Edited time:** July 08, 2019, 18:19 UTC
- **ARN:** `arn:aws:iam::aws:policy/service-role/AmazonDMSRedshiftS3Role`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:CreateBucket",
        "s3:ListBucket",
        "s3>DeleteBucket",

AmazonDocDBElasticFullAccess

Description: Provides full access to Amazon DocumentDB Elastic Clusters and other required permissions for its dependencies including EC2, KMS, SecretsManager, CloudWatch and IAM.

AmazonDocDBElasticFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonDocDBElasticFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** June 05, 2023, 13:51 UTC
- **Edited time:** February 11, 2025, 18:22 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonDocDBElasticFullAccess

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDynamoDBReadOnlyAccess

Description: Provides read only access to Amazon DynamoDB via the AWS Management Console.

AmazonDynamoDBReadOnlyAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonDynamoDBReadOnlyAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** February 06, 2015, 18:40 UTC
- **Edited time:** November 18, 2024, 17:38 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonDynamoDBReadOnlyAccess

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonEC2ContainerServiceRole

Description: Default policy for Amazon ECS service role.

AmazonEC2ContainerServiceRole is an [AWS managed policy](#).

Using this policy

You can attach AmazonEC2ContainerServiceRole to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** April 09, 2015, 16:14 UTC
- **Edited time:** August 11, 2016, 13:08 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmazonEC2ContainerServiceRole

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:AuthorizeSecurityGroupIngress",
        "ec2:Describe*",
        "elasticloadbalancing:DeregisterInstancesFromLoadBalancer",
        "elasticloadbalancing:DeregisterTargets",
        "elasticloadbalancing:Describe*",
        "elasticloadbalancing:RegisterInstancesWithLoadBalancer",
        "elasticloadbalancing:RegisterTargets"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonEC2FullAccess

Description: Provides full access to Amazon EC2 via the AWS Management Console.

AmazonEC2FullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonEC2FullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** February 06, 2015, 18:40 UTC
- **Edited time:** November 27, 2018, 02:16 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonEC2FullAccess

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : "ec2:*",
      "Effect" : "Allow",
      "Resource" : "*"
    },
    {

AmazonEKS_CNI_Policy

Description: This policy provides the Amazon VPC CNI Plugin (amazon-vpc-cni-k8s) the permissions it requires to modify the IP address configuration on your EKS worker nodes. This permission set allows the CNI to list, describe, and modify Elastic Network Interfaces on your behalf. More information on the AWS VPC CNI Plugin is available here: <https://github.com/aws/amazon-vpc-cni-k8s>

AmazonEKS_CNI_Policy is an [AWS managed policy](#).

Using this policy

You can attach AmazonEKS_CNI_Policy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** May 27, 2018, 21:07 UTC
- **Edited time:** March 04, 2024, 20:20 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonEKS_CNI_Policy

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonEKSFargatePodExecutionRolePolicy

Description: Provides access to other AWS service resources that are required to run Amazon EKS pods on AWS Fargate

AmazonEKSFargatePodExecutionRolePolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonEKSFargatePodExecutionRolePolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 22, 2019, 04:34 UTC

- **Edited time:** November 22, 2019, 04:34 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonEKSFargatePodExecutionRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ecr:GetAuthorizationToken",
        "ecr:BatchCheckLayerAvailability",

AmazonEKSNetworkingPolicy

Description: Policy attached to the EKS Cluster Role that grants permissions to manage the cluster's networking resources.

AmazonEKSNetworkingPolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonEKSNetworkingPolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** October 28, 2024, 22:34 UTC
- **Edited time:** October 28, 2024, 22:34 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonEKSNetworkingPolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonEKSServicePolicy

Description: This policy allows Amazon Elastic Container Service for Kubernetes to create and manage the necessary resources to operate EKS Clusters.

AmazonEKSServicePolicy is an [AWS managed policy](#).

Using this policy

You can attach `AmazonEKSServicePolicy` to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** May 27, 2018, 21:08 UTC
- **Edited time:** October 14, 2024, 21:12 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonEKSServicePolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSServiceRolePolicy

Description: A Service-Linked Role required for Amazon EKS to call AWS services on your behalf.

AmazonEKSServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** February 21, 2020, 20:10 UTC
- **Edited time:** November 16, 2024, 17:42 UTC
- **ARN:** arn:aws:iam::aws:policy/aws-service-role/AmazonEKSServiceRolePolicy

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonElasticFileSystemServiceRolePolicy

Description: Allows Amazon Elastic File System to manage AWS resources on your behalf

AmazonElasticFileSystemServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** November 05, 2019, 16:52 UTC
- **Edited time:** November 07, 2024, 19:19 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonElasticFileSystemServiceRolePolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonElasticsearchServiceRolePolicy

Description: Allow Amazon Elasticsearch Service to access other AWS services such as EC2 Networking APIs on your behalf.

AmazonElasticsearchServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** July 07, 2017, 00:15 UTC
- **Edited time:** October 23, 2023, 06:58 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonElasticsearchServiceRolePolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonElasticTranscoder_FullAccess

Description: Grants users full access to Elastic Transcoder and the access to associated services that is required for full Elastic Transcoder functionality.

AmazonElasticTranscoder_FullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonElasticTranscoder_FullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** April 27, 2018, 18:59 UTC
- **Edited time:** June 10, 2019, 22:51 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonElasticTranscoder_FullAccess

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [

AmazonEMRCleanupPolicy

Description: Allows the actions that EMR requires to terminate and delete AWS EC2 resources if the EMR Service role has lost that ability.

AmazonEMRCleanupPolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** September 26, 2017, 23:54 UTC
- **Edited time:** September 29, 2020, 21:11 UTC
- **ARN:** arn:aws:iam::aws:policy/aws-service-role/AmazonEMRCleanupPolicy

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonEMRReadOnlyAccessPolicy_v2

Description: Provides read only access to Amazon EMR and the associated CloudWatch Metrics.

AmazonEMRReadOnlyAccessPolicy_v2 is an [AWS managed policy](#).

Using this policy

You can attach AmazonEMRReadOnlyAccessPolicy_v2 to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** March 12, 2021, 01:39 UTC
- **Edited time:** August 02, 2023, 19:15 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonEMRReadOnlyAccessPolicy_v2

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRServerlessServiceRolePolicy

Description: Allows access to other AWS service resources that are required to run Amazon EMRServerless

AmazonEMRServerlessServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** May 20, 2022, 23:15 UTC
- **Edited time:** January 25, 2024, 18:21 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonEMRServerlessServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRServicePolicy_v2

Description: This policy is used for the Amazon EMR Service Role and should NOT be used for any other IAM users or roles in your account. The policy grants permissions to create and manage resources associated with EMR and related services necessary for the operation of your EMR cluster.

AmazonEMRServicePolicy_v2 is an [AWS managed policy](#).

Using this policy

You can attach AmazonEMRServicePolicy_v2 to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** March 12, 2021, 01:11 UTC
- **Edited time:** May 02, 2024, 18:43 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmazonEMRServicePolicy_v2

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEventBridgePipesFullAccess

Description: Provides full access to Amazon EventBridge Pipes.

AmazonEventBridgePipesFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonEventBridgePipesFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** December 01, 2022, 17:03 UTC
- **Edited time:** December 01, 2022, 17:03 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonEventBridgePipesFullAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "EventBridgePipesActions",
      "Effect" : "Allow",
      "Action" : "pipes:*",
      "Resource" : "*"
    },
    {
      "Sid" : "IAMPassRoleAccessForPipes",
      "Effect" : "Allow",
      "Action" : "iam:PassRole",
      "Resource" : "arn:aws:iam::*:role/*",
      "Condition" : {
        "StringLike" : {
          "iam:PassedToService" : "pipes.amazonaws.com"
        }
      }
    }
  ]
}
```

```
}  
  }  
    }  
  ]  
}
```

AmazonFreeRTOSFullAccess

Description: Full Access Policy for Amazon FreeRTOS

AmazonFreeRTOSFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonFreeRTOSFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 29, 2017, 15:32 UTC

- **Edited time:** November 29, 2017, 15:32 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonFreeRTOSFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "freertos:*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonGlacierFullAccess

Description: Provides full access to Amazon Glacier via the AWS Management Console.

AmazonGlacierFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonGlacierFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** February 06, 2015, 18:40 UTC
- **Edited time:** February 06, 2015, 18:40 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonGlacierFullAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : "glacier:*",
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonGuardDutyMalwareProtectionServiceRolePolicy

Description: GuardDuty malware protection uses the service-linked role (SLR) named `AWSServiceRoleForAmazonGuardDutyMalwareProtection`. This service-linked role allows GuardDuty malware protection to perform agent-less scans to detect malware. It allows GuardDuty to create snapshots in your account, and share the snapshots with the GuardDuty service account to scan for malware. It evaluates these shared snapshots and includes the retrieved EC2 instance metadata in the GuardDuty Malware Protection findings. The `AWSServiceRoleForAmazonGuardDutyMalwareProtection` service-linked role trusts the `malware-protection.guardduty.amazonaws.com` service to assume the role.

`AmazonGuardDutyMalwareProtectionServiceRolePolicy` is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

AmazonGuardDutyReadOnlyAccess

Description: Provides read only access to Amazon GuardDuty resources

AmazonGuardDutyReadOnlyAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonGuardDutyReadOnlyAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 28, 2017, 22:29 UTC
- **Edited time:** November 16, 2023, 23:07 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonGuardDutyReadOnlyAccess

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "guardduty:Describe*",
        "guardduty:Get*",
        "guardduty:List*"
      ],
      "Resource" : "*"
    },
    {
```

```
"Effect" : "Allow",

AmazonHoneycodeWorkbookReadOnlyAccess

Description: Provides read only access to Honeycode Workbook via the AWS Management Console and the SDK.

AmazonHoneycodeWorkbookReadOnlyAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonHoneycodeWorkbookReadOnlyAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** June 24, 2020, 20:28 UTC
- **Edited time:** December 01, 2020, 17:32 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonHoneycodeWorkbookReadOnlyAccess

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "honeycode:GetScreenData",
        "honeycode:DescribeTableDataImportJob",

- **Edited time:** October 07, 2015, 18:43 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonKinesisFirehoseReadOnlyAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "firehose:Describe*",
        "firehose:List*"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonKinesisFullAccess

Description: Provides full access to all streams via the AWS Management Console.

AmazonKinesisFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonKinesisFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** February 06, 2015, 18:40 UTC
- **Edited time:** February 06, 2015, 18:40 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonKinesisFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "kinesis:*",
      "Resource" : "*"
    }
  ]
}
```

AmazonLaunchWizardFullAccessV2

Description: Full access to AWS Launch wizard and other required services.

AmazonLaunchWizardFullAccessV2 is an [AWS managed policy](#).

Using this policy

You can attach AmazonLaunchWizardFullAccessV2 to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 01, 2023, 17:14 UTC
- **Edited time:** September 01, 2023, 17:14 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonLaunchWizardFullAccessV2`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonLexChannelsAccess

Description: This policy allows customers to call Lex runtime from channels

AmazonLexChannelsAccess is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** January 13, 2021, 20:12 UTC
- **Edited time:** January 13, 2021, 20:12 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonLexChannelsAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
```

```
"Statement" : [
  {
    "Action" : [
      "lex:ListBots"
    ],
    "Effect" : "Allow",
    "Resource" : "*"
  }
]
```

AmazonLexFullAccess

Description: Provides full access to Amazon Lex via the AWS Management Console. Also provides access to create Lex Service Linked Roles and grant Lex permissions to invoke a limited set of Lambda functions.

AmazonLexFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonLexFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** April 11, 2017, 23:20 UTC
- **Edited time:** April 16, 2024, 20:06 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonLexFullAccess

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonLookoutEquipmentFullAccess

Description: Provides full access to Amazon Lookout for Equipment operations

AmazonLookoutEquipmentFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonLookoutEquipmentFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** April 08, 2021, 15:52 UTC
- **Edited time:** November 24, 2021, 21:00 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonLookoutEquipmentFullAccess

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "lookoutequipment:*"
      ],

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "memorydb:*",
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : "iam:CreateServiceLinkedRole",
      "Resource" : "arn:aws:iam::*:role/aws-service-role/memorydb.amazonaws.com/AWSServiceRoleForMemoryDB",
      "Condition" : {
        "StringLike" : {
          "iam:AWSServiceName" : "memorydb.amazonaws.com"
        }
      }
    }
  ]
}
```

```
    }  
  }  
]  
}
```

AmazonMSKReadOnlyAccess

Description: Provide readonly access to Amazon MSK

AmazonMSKReadOnlyAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonMSKReadOnlyAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** January 14, 2019, 22:28 UTC
- **Edited time:** January 14, 2019, 22:28 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonMSKReadOnlyAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "kafka:Describe*",
        "kafka:List*",
        "kafka:Get*",
        "ec2:DescribeNetworkInterfaces",
        "ec2:DescribeSecurityGroups",
        "ec2:DescribeSubnets",
        "ec2:DescribeVpcs",
```

```
    "kms:DescribeKey"
  ],
  "Effect" : "Allow",
  "Resource" : "*"
}
]
```

AmazonOneEnterpriseFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonOneEnterpriseFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 28, 2023, 04:58 UTC
- **Edited time:** November 28, 2023, 04:58 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonOneEnterpriseFullAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "FullAccessStatementID",
      "Effect" : "Allow",
      "Action" : [
        "one:*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonOneEnterpriseInstallerAccess

Description: This policy grants limited read and write permissions that allow device installation and activation.

AmazonOneEnterpriseInstallerAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonOneEnterpriseInstallerAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 28, 2023, 05:00 UTC

- **Edited time:** November 28, 2023, 05:00 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonOneEnterpriseInstallerAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "InstallerAccessStatementID",
      "Effect" : "Allow",
      "Action" : [
        "one:CreateDeviceActivationQrCode",
        "one:GetDeviceInstance",
        "one:GetSite",
        "one:GetSiteAddress",
        "one:ListDeviceInstances",
        "one:ListSites"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonPersonalizeFullAccess

Description: Provides full access to Amazon Personalize via the AWS Management Console and SDK. Also provides select access to related services (e.g., S3, CloudWatch).

AmazonPersonalizeFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonPersonalizeFullAccess to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** December 04, 2018, 22:24 UTC
- **Edited time:** May 30, 2019, 23:46 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmazonPersonalizeFullAccess

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "personalize:*"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "cloudwatch:PutMetricData",
        "cloudwatch:ListMetrics"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:GetObject",
        "s3:PutObject",
        "s3:DeleteObject",
        "s3:ListBucket"
      ],
      "Resource" : [
        "arn:aws:s3::*Personalize*",
        "arn:aws:s3::*personalize*"
      ]
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "iam:PassRole"
      ],

AmazonRDSBetaServiceRolePolicy

Description: Allows Amazon RDS to manage AWS resources on your behalf.

AmazonRDSBetaServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** May 02, 2018, 19:41 UTC
- **Edited time:** August 07, 2024, 00:54 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSBetaServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonRDSCustomPreviewServiceRolePolicy

Description: Amazon RDS Custom Preview Service Role Policy

AmazonRDSCustomPreviewServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** October 08, 2021, 21:44 UTC
- **Edited time:** September 20, 2023, 17:48 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSCustomPreviewServiceRolePolicy`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRDSCustomServiceRolePolicy

Description: Allows Amazon RDS Custom to manage AWS resources on your behalf.

AmazonRDSCustomServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** October 08, 2021, 21:39 UTC
- **Edited time:** July 18, 2024, 17:33 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSCustomServiceRolePolicy`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRDSDataFullAccess

Description: Allows full access to use the RDS data APIs, secret store APIs for RDS database credentials, and DB console query management APIs to execute SQL statements on Aurora Serverless clusters in the AWS account.

AmazonRDSDataFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonRDSDataFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 20, 2018, 21:29 UTC
- **Edited time:** November 20, 2019, 21:58 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonRDSDataFullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonRDSReadOnlyAccess

Description: Provides read only access to Amazon RDS via the AWS Management Console.

AmazonRDSReadOnlyAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonRDSReadOnlyAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** February 06, 2015, 18:40 UTC
- **Edited time:** April 14, 2023, 12:32 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonRDSReadOnlyAccess

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonRDSServiceRolePolicy

Description: Allows Amazon RDS to manage AWS resources on your behalf.

AmazonRDSServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** January 08, 2018, 18:17 UTC
- **Edited time:** July 01, 2024, 22:42 UTC
- **ARN:** arn:aws:iam::aws:policy/aws-service-role/AmazonRDSServiceRolePolicy

Policy version

Policy version: v14 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftQueryEditor

Description: Provides full access to the Amazon Redshift Query Editor and to saved queries via the AWS Management Console.

AmazonRedshiftQueryEditor is an [AWS managed policy](#).

Using this policy

You can attach AmazonRedshiftQueryEditor to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** October 04, 2018, 22:50 UTC
- **Edited time:** February 16, 2021, 19:33 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonRedshiftQueryEditor

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftQueryEditorV2FullAccess

Description: Grants full access to the Amazon Redshift Query Editor V2 operations and resources. This policy also grants access to other required services. This includes permissions to list the Amazon Redshift clusters, read keys and aliases in AWS KMS and manage the Query Editor V2 secrets in AWS Secrets Manager.

AmazonRedshiftQueryEditorV2FullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonRedshiftQueryEditorV2FullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy

- **Creation time:** September 24, 2021, 14:06 UTC
- **Edited time:** February 21, 2024, 17:20 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonRedshiftQueryEditorV2FullAccess

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonRedshiftQueryEditorV2ReadWriteSharing

Description: Grants the ability to work with Amazon Redshift Query Editor V2 with sharing of resources. The granted principal can read, write and share its own resources. The granted principal can read and update the resources shared with its team. This policy also grants access to other required services. This includes permissions to list the Amazon Redshift clusters and manage the Query Editor V2 secrets of the principal in AWS Secrets Manager.

AmazonRedshiftQueryEditorV2ReadWriteSharing is an [AWS managed policy](#).

Using this policy

You can attach AmazonRedshiftQueryEditorV2ReadWriteSharing to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 24, 2021, 14:25 UTC
- **Edited time:** February 21, 2024, 17:30 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonRedshiftQueryEditorV2ReadWriteSharing`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftReadOnlyAccess

Description: Provides read only access to Amazon Redshift via the AWS Management Console.

AmazonRedshiftReadOnlyAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonRedshiftReadOnlyAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** February 06, 2015, 18:40 UTC
- **Edited time:** February 08, 2024, 00:24 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonRedshiftReadOnlyAccess

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
"Version" : "2012-10-17",

AmazonRedshiftServiceLinkedRolePolicy

Description: Allows Amazon Redshift to call AWS services on your behalf

AmazonRedshiftServiceLinkedRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** September 18, 2017, 19:19 UTC
- **Edited time:** February 19, 2025, 17:22 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonRedshiftServiceLinkedRolePolicy`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRekognitionCustomLabelsFullAccess

Description: This policy specifies rekognition and s3 permissions required by Amazon Rekognition Custom Labels feature.

AmazonRekognitionCustomLabelsFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonRekognitionCustomLabelsFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** January 08, 2020, 19:18 UTC
- **Edited time:** August 16, 2022, 20:20 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonRekognitionCustomLabelsFullAccess

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonSageMakerCanvasAIServicesAccess

Description: Provides permissions for Amazon SageMaker Canvas to use AI services to support ready to use AI solutions. This policy will add more mutating permissions for services as Amazon SageMaker Canvas adds support.

AmazonSageMakerCanvasAIServicesAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerCanvasAIServicesAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** March 23, 2023, 22:36 UTC
- **Edited time:** November 29, 2023, 14:47 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonSageMakerCanvasAIServicesAccess

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasBedrockAccess

Description: This policy grants permissions to use Amazon Bedrock in SageMaker Canvas by providing access to downstream services such as S3.

AmazonSageMakerCanvasBedrockAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerCanvasBedrockAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** February 02, 2024, 18:37 UTC
- **Edited time:** February 02, 2024, 18:37 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonSageMakerCanvasBedrockAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerCanvasDataPrepFullAccess

Description: Provides full access to Amazon SageMaker resources and operations for data preparation in Canvas. The policy also provides select access to related services (e.g., S3, IAM, KMS, RDS, CloudWatch Logs, Redshift, Athena, Glue, EventBridge, Secrets Manager). This policy should be attached to the Amazon SageMaker Domain/User Profile execution role.

AmazonSageMakerCanvasDataPrepFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerCanvasDataPrepFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** October 27, 2023, 22:56 UTC
- **Edited time:** August 16, 2024, 18:11 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonSageMakerCanvasDataPrepFullAccess

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonSageMakerCanvasDirectDeployAccess

Description: Allows Amazon SageMaker Canvas to create, manage and view endpoint details for endpoints created through Canvas. Allows Amazon SageMaker Canvas to retrieve endpoint invocation metrics from CloudWatch.

AmazonSageMakerCanvasDirectDeployAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerCanvasDirectDeployAccess to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** October 06, 2023, 18:11 UTC
- **Edited time:** October 06, 2023, 18:11 UTC
- **ARN:** `arn:aws:iam::aws:policy/service-role/AmazonSageMakerCanvasDirectDeployAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "SageMakerEndpointPerms",
      "Effect" : "Allow",
      "Action" : [
        "sagemaker:CreateEndpoint",
        "sagemaker:CreateEndpointConfig",
        "sagemaker>DeleteEndpoint",
        "sagemaker:DescribeEndpoint",
        "sagemaker:DescribeEndpointConfig",
        "sagemaker:InvokeEndpoint",

AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy

Description: This policy grants permissions to Amazon EMR Serverless for services such as S3, used by Amazon SageMaker Canvas for large data processing.

AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** July 27, 2024, 00:35 UTC
- **Edited time:** July 27, 2024, 00:35 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasForecastAccess

Description: This policy grants permissions commonly needed to use SageMaker Canvas with Amazon Forecast.

AmazonSageMakerCanvasForecastAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerCanvasForecastAccess to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** August 24, 2022, 20:04 UTC
- **Edited time:** August 24, 2022, 20:04 UTC
- **ARN:** `arn:aws:iam::aws:policy/service-role/AmazonSageMakerCanvasForecastAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerCanvasFullAccess

Description: Provides full access to Amazon SageMaker Canvas resources and operations. The policy also provides select access to related services (e.g., S3, IAM, VPC, ECR, CloudWatch Logs,

Redshift, Secrets Manager, and Forecast). This policy should be attached to the Amazon SageMaker Domain/User Profile execution role.

AmazonSageMakerCanvasFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerCanvasFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 09, 2022, 00:44 UTC
- **Edited time:** August 16, 2024, 04:35 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonSageMakerCanvasFullAccess

Policy version

Policy version: v11 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasSMDataScienceAssistantAccess

Description: Provides permissions for Amazon SageMaker Canvas to use the SageMaker Data Science Assistant service. The Data Science Assistant currently uses both Amazon SageMaker and Amazon Q Developer to process user prompts.

AmazonSageMakerCanvasSMDataScienceAssistantAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerCanvasSMDataScienceAssistantAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** December 04, 2024, 14:06 UTC
- **Edited time:** January 13, 2025, 22:52 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonSageMakerCanvasSMDataScienceAssistantAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "SageMakerDataScienceAssistantAccess",
      "Effect" : "Allow",
```

```

AmazonSageMakerClusterInstanceRolePolicy

Description: This policy grants permissions commonly needed to use Amazon SageMaker Cluster.

AmazonSageMakerClusterInstanceRolePolicy is an [AWS managed policy](#).

Using this policy

You can attach `AmazonSageMakerClusterInstanceRolePolicy` to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 29, 2023, 15:11 UTC
- **Edited time:** November 29, 2023, 15:11 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonSageMakerClusterInstanceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCoreServiceRolePolicy

Description: Managed policy for Service Linked Role for Amazon SageMaker Core Services

AmazonSageMakerCoreServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** December 21, 2020, 21:40 UTC
- **Edited time:** December 21, 2020, 21:40 UTC
- **ARN:** arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerCoreServiceRolePolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerEdgeDeviceFleetPolicy

Description: Provides permissions necessary for SageMaker Edge to create and manage a device fleet for the customer using the default cloud connection.

AmazonSageMakerEdgeDeviceFleetPolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerEdgeDeviceFleetPolicy to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** December 08, 2020, 16:17 UTC
- **Edited time:** December 08, 2020, 16:17 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmazonSageMakerEdgeDeviceFleetPolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerFeatureStoreAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerFeatureStoreAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** December 01, 2020, 16:24 UTC
- **Edited time:** December 05, 2022, 14:19 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonSageMakerFeatureStoreAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:PutObject",
        "s3:GetBucketAcl",
        "s3:PutObjectAcl"
      ],
      "Resource" : [
        "arn:aws:s3::*SageMaker*",
        "arn:aws:s3::*Sagemaker*",
        "arn:aws:s3::*sagemaker*"
      ]
    }
  ],
}
```

```
{
  "Effect" : "Allow",
  "Action" : [
    "s3:GetObject"
  ],
  "Resource" : [
    "arn:aws:s3::*SageMaker*/metadata/*",
    "arn:aws:s3::*Sagemaker*/metadata/*",
    "arn:aws:s3::*sagemaker*/metadata/*"
  ]
},
{

AmazonSageMakerFullAccess

Description: Provides full access to Amazon SageMaker via the AWS Management Console and SDK. Also provides select access to related services (e.g., S3, ECR, CloudWatch Logs).

AmazonSageMakerFullAccess is an [AWS managed policy](#).

Using this policy

You can attach `AmazonSageMakerFullAccess` to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 29, 2017, 13:07 UTC
- **Edited time:** December 04, 2024, 13:21 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonSageMakerFullAccess`

Policy version

Policy version: v27 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerGeospatialExecutionRole

Description: This policy provide access to services that are commonly needed to use SageMaker geospatial.

AmazonSageMakerGeospatialExecutionRole is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerGeospatialExecutionRole to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** November 30, 2022, 10:08 UTC
- **Edited time:** May 10, 2023, 20:28 UTC
- **ARN:** `arn:aws:iam::aws:policy/service-role/AmazonSageMakerGeospatialExecutionRole`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerHyperPodServiceRolePolicy

Description: This policy grants permissions to Amazon SageMaker HyperPod to related AWS services such as Amazon EKS, Amazon CloudWatch etc.

AmazonSageMakerHyperPodServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** September 06, 2024, 17:04 UTC
- **Edited time:** September 06, 2024, 17:04 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerHyperPodServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerNotebooksServiceRolePolicy

Description: Managed policy for Service Linked Role for Amazon SageMaker Notebooks

AmazonSageMakerNotebooksServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** October 18, 2019, 20:27 UTC
- **Edited time:** November 14, 2024, 20:33 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerNotebooksServiceRolePolicy`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonSageMakerReadOnly

Description: Provides read only access to Amazon SageMaker via the AWS Management Console and SDK.

AmazonSageMakerReadOnly is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerReadOnly to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 29, 2017, 13:07 UTC
- **Edited time:** December 01, 2021, 16:29 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonSageMakerReadOnly

Policy version

Policy version: v11 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerServiceCatalogProductsCodePipelineServiceRole

Description: Service role policy used by the AWS CodePipeline within the AWS ServiceCatalog provisioned products from Amazon SageMaker portfolio of products. Grants permissions to a subset of related services including CodePipeline, CodeBuild and others.

AmazonSageMakerServiceCatalogProductsCodePipelineServiceRolePolicy is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerServiceCatalogProductsCodePipelineServiceRolePolicy to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** February 22, 2022, 09:53 UTC
- **Edited time:** June 11, 2024, 18:37 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmazonSageMakerServiceCatalogProductsCodePipelineServiceRolePolicy

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerTrainingPlanCreateAccess

Description: This Amazon Managed Policy provides the necessary permissions to create and manage SageMaker Training Plans. It allows users to create Training Plans and Reserved Capacities, describe existing Training Plans, and perform search and listing operations.

AmazonSageMakerTrainingPlanCreateAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonSageMakerTrainingPlanCreateAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** December 04, 2024, 13:21 UTC
- **Edited time:** December 04, 2024, 13:21 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonSageMakerTrainingPlanCreateAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [

AmazonSecurityLakeAdministrator

Description: Provides full access to Amazon Security Lake and related services needed to administer Security Lake.

AmazonSecurityLakeAdministrator is an [AWS managed policy](#).

Using this policy

You can attach AmazonSecurityLakeAdministrator to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** May 30, 2023, 22:04 UTC
- **Edited time:** February 23, 2024, 16:01 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonSecurityLakeAdministrator

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSecurityLakeMetastoreManager

Description: Policy for Amazon SecurityLake meta store manager lambda which allows the access to cloudwatch, S3, Glue and SQS.

AmazonSecurityLakeMetastoreManager is an [AWS managed policy](#).

Using this policy

You can attach AmazonSecurityLakeMetastoreManager to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** January 23, 2024, 15:26 UTC
- **Edited time:** April 01, 2024, 20:04 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmazonSecurityLakeMetastoreManager

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonSecurityLakePermissionsBoundary

Description: Amazon Security Lake creates IAM roles for third-party custom sources to write data to a data lake and for third-party subscribers to consume data from a data lake, and uses this policy when creating these roles to define the boundary of their permissions.

AmazonSecurityLakePermissionsBoundary is an [AWS managed policy](#).

Using this policy

You can attach AmazonSecurityLakePermissionsBoundary to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 29, 2022, 14:11 UTC
- **Edited time:** May 14, 2024, 20:39 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonSecurityLakePermissionsBoundary

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

- **Type:** Service-linked role policy
- **Creation time:** November 13, 2017, 19:20 UTC
- **Edited time:** November 15, 2024, 14:08 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AmazonSSMServiceRolePolicy`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSumerianFullAccess

Description: Provides full access to Amazon Sumerian.

AmazonSumerianFullAccess is an [AWS managed policy](#).

Using this policy

You can attach `AmazonSumerianFullAccess` to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** April 24, 2018, 20:14 UTC
- **Edited time:** April 24, 2018, 20:14 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonSumerianFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "sumerian:*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonTextractFullAccess

Description: Access to all Amazon Textract APIs

AmazonTextractFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonTextractFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 28, 2018, 19:07 UTC
- **Edited time:** November 28, 2018, 19:07 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonTextractFullAccess

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "textract:*"
      ],
    },
  ],
}
```

```
    "Resource" : "*"
  }
]
}

AmazonTextractServiceRole

Description: Allows Textract to call AWS services on your behalf.

AmazonTextractServiceRole is an [AWS managed policy](#).

Using this policy

You can attach AmazonTextractServiceRole to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** November 28, 2018, 19:12 UTC
- **Edited time:** November 28, 2018, 19:12 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmazonTextractServiceRole

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",

AmazonTimestreamReadOnlyAccess

Description: Provides read only access to Amazon Timestream. Policy also provides permission to cancel any running query. If using Customer managed CMK, please refer to documentation for additional permissions needed.

AmazonTimestreamReadOnlyAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonTimestreamReadOnlyAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** September 30, 2020, 21:47 UTC
- **Edited time:** June 05, 2024, 19:11 UTC
- **ARN:** arn:aws:iam::aws:policy/AmazonTimestreamReadOnlyAccess

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonVPCReachabilityAnalyzerPathComponentReadPolicy

Description: This policy is attached to the role `IAMRoleForReachabilityAnalyzerCrossAccountResourceAccess`. This role is deployed to the member accounts in an organization when the management account enables trusted access for Reachability Analyzer. It provides permissions to view resources from across your organization using the Reachability Analyzer console.

`AmazonVPCReachabilityAnalyzerPathComponentReadPolicy` is an [AWS managed policy](#).

Using this policy

You can attach `AmazonVPCReachabilityAnalyzerPathComponentReadPolicy` to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** May 01, 2023, 20:38 UTC
- **Edited time:** May 01, 2023, 20:38 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonVPCReachabilityAnalyzerPathComponentReadPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "NetworkFirewallPermissions",
      "Effect" : "Allow",
      "Action" : [
        "network-firewall:Describe*",
        "network-firewall:List*"
      ],
      "Resource" : "*"
    }
  ]
}
```

Description: Provides administrator access for packaging an application in Amazon WorkSpaces Application Manager.

AmazonWorkSpacesApplicationManagerAdminAccess is an [AWS managed policy](#).

Using this policy

You can attach AmazonWorkSpacesApplicationManagerAdminAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy

- **Creation time:** April 09, 2015, 14:03 UTC
- **Edited time:** April 09, 2015, 14:03 UTC
- **ARN:** `arn:aws:iam::aws:policy/AmazonWorkSpacesApplicationManagerAdminAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "wam:AuthenticatePackager",
      "Resource" : "*"
    }
  ]
}
```

AmplifyBackendDeployFullAccess

Description: Provides Amplify full access permissions to deploy Amplify backend resources (AWS AppSync, Amazon Cognito, Amazon S3 and other related services) via the AWS Cloud Development Kit (AWS CDK)

AmplifyBackendDeployFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AmplifyBackendDeployFullAccess to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** October 06, 2023, 21:32 UTC
- **Edited time:** November 14, 2024, 19:09 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AmplifyBackendDeployFullAccess

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AppStudioServiceRolePolicy

Description: Allows AppStudio to manage associated AWS resources on your behalf.

AppStudioServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** July 10, 2024, 05:01 UTC
- **Edited time:** July 10, 2024, 05:01 UTC
- **ARN:** arn:aws:iam::aws:policy/aws-service-role/AppStudioServiceRolePolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AWS-SSM-DiagnosisAutomation-AdministrationRolePolicy

Description: Provide permission for Diagnosing issues with SSM services by executing activities defined within Automation Documents, primarily used for running the Automation documents in a cross-account cross-region setup by triggering child automations within member accounts.

AWS-SSM-DiagnosisAutomation-AdministrationRolePolicy is an [AWS managed policy](#).

Using this policy

You can attach AWS-SSM-DiagnosisAutomation-AdministrationRolePolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 16, 2024, 00:01 UTC
- **Edited time:** November 16, 2024, 00:01 UTC
- **ARN:** arn:aws:iam::aws:policy/AWS-SSM-DiagnosisAutomation-AdministrationRolePolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWS-SSM-RemediationAutomation-OperationalAccountAdministrationRolePolicy

Description: Provides permissions for operational accounts to Remediate unmanaged nodes by providing Organisation specific permissions required by SSM automation to pull the list of member accounts within a root of an Organisation to trigger cross-account cross-region execution by allowing assuming Execution roles in target account/region.

AWS-SSM-RemediationAutomation-OperationalAccountAdministrationRolePolicy is an [AWS managed policy](#).

Using this policy

You can attach `AWS-SSM-RemediationAutomation-OperationalAccountAdministrationRolePolicy` to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 16, 2024, 00:25 UTC
- **Edited time:** November 16, 2024, 00:25 UTC
- **ARN:** `arn:aws:iam::aws:policy/AWS-SSM-RemediationAutomation-OperationalAccountAdministrationRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AllowReadOnlyAccessOrganization",
      "Effect" : "Allow",
      "Action" : [
        "organizations:ListRoots",
        "organizations:ListChildren"
      ],
      "Resource" : "*"
    },
    {
      "Sid" : "AllowAssumeRemediationExecutionRoleWithinOrg",
      "Effect" : "Allow",
      "Action" : "sts:AssumeRole",
      "Resource" : "arn:aws:iam::*:role/AWS-SSM-RemediationExecutionRole*",
    }
  ]
}
```

```
    "Condition" : {
      "StringEquals" : {
        "aws:ResourceOrgId" : "${aws:PrincipalOrgId}"
      }
    }
  }
]
```

AWS_ConfigRole

Description: Default policy for AWS Config service role. Provides permissions required for AWS Config to track changes to your AWS resources.

AWS_ConfigRole is an [AWS managed policy](#).

Using this policy

You can attach AWS_ConfigRole to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** September 15, 2020, 20:30 UTC
- **Edited time:** January 16, 2025, 16:22 UTC
- **ARN:** arn:aws:iam::aws:policy/service-role/AWS_ConfigRole

Policy version

Policy version: v34 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AWSApplicationAutoscalingEC2SpotFleetRequestPolicy

Description: Policy granting permissions to Application Auto Scaling to access EC2 Spot Fleet and CloudWatch.

AWSApplicationAutoscalingEC2SpotFleetRequestPolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** October 25, 2017, 18:23 UTC
- **Edited time:** October 25, 2017, 18:23 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AWSApplicationAutoscalingEC2SpotFleetRequestPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:DescribeSpotFleetRequests",
        "ec2:ModifySpotFleetRequest",
        "cloudwatch:PutMetricAlarm",
```

```
        "cloudwatch:DescribeAlarms",
        "cloudwatch:DeleteAlarms"
    ],
    "Resource" : [
        "*"
    ]
}
]
```

AWSApplicationMigrationAgentInstallationPolicy

Description: This policy allows installing the AWS Replication Agent, which is used with AWS Application Migration Service (MGN) to migrate external servers to AWS. Attach this policy to your IAM users or roles whose credentials you provide when installing the AWS Replication Agent.

AWSApplicationMigrationAgentInstallationPolicy is an [AWS managed policy](#).

Using this policy

You can attach AWSApplicationMigrationAgentInstallationPolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** June 19, 2022, 07:51 UTC
- **Edited time:** September 20, 2022, 11:21 UTC
- **ARN:** `arn:aws:iam::aws:policy/AWSApplicationMigrationAgentInstallationPolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWSApplicationMigrationConversionServerPolicy

Description: This policy allows the Application Migration Service (MGN) Conversion Server, which are EC2 instances launched by Application Migration Service, to communicate with the MGN service. An IAM role with this policy is attached (as an EC2 Instance Profile) by MGN to the MGN Conversion Servers, which are automatically launched and terminated by MGN, when needed. We do not recommend that you attach this policy to your IAM users or roles. MGN Conversion Servers are used by Application Migration Service when users choose to launch Test or Cutover instances using the MGN console, CLI, or API.

AWSApplicationMigrationConversionServerPolicy is an [AWS managed policy](#).

Using this policy

You can attach `AWSApplicationMigrationConversionServerPolicy` to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** April 07, 2021, 06:48 UTC
- **Edited time:** April 07, 2021, 06:48 UTC
- **ARN:** `arn:aws:iam::aws:policy/service-role/AWSApplicationMigrationConversionServerPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AWSApplicationMigrationFullAccess

Description: This policy provides permissions to all public APIs of AWS Application Migration Service (MGN), as well as permissions to read KMS key information. Attach this policy to your IAM users or roles.

AWSApplicationMigrationFullAccess is an [AWS managed policy](#).

Using this policy

You can attach AWSApplicationMigrationFullAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** April 07, 2021, 06:56 UTC
- **Edited time:** May 19, 2024, 08:30 UTC
- **ARN:** `arn:aws:iam::aws:policy/AWSApplicationMigrationFullAccess`

Policy version

Policy version: v8 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWSApplicationMigrationMGHAccess

Description: This policy allows AWS Application Migration Service (MGN) to send meta-data about the progress of servers being migrated using MGN to AWS Migration Hub (MGH). MGN automatically creates an IAM role with this policy attached, and assumes this role. We do not recommend that you attach this policy to your IAM users or roles.

AWSApplicationMigrationMGHAccess is an [AWS managed policy](#).

Using this policy

You can attach AWSApplicationMigrationMGHAccess to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** April 07, 2021, 07:10 UTC
- **Edited time:** April 07, 2021, 07:10 UTC
- **ARN:** `arn:aws:iam::aws:policy/service-role/AWSApplicationMigrationMGHAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
```

AWSApplicationMigrationReadOnlyAccess

Description: This policy provides permissions to all read-only public APIs of Application Migration Service (MGN), as well as some read-only APIs of other AWS services that are required in order to make full read-only use of the MGN console. Attach this policy to your IAM users or roles.

AWSApplicationMigrationReadOnlyAccess is an [AWS managed policy](#).

Using this policy

You can attach AWSApplicationMigrationReadOnlyAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** April 07, 2021, 07:15 UTC
- **Edited time:** March 20, 2023, 08:58 UTC
- **ARN:** arn:aws:iam::aws:policy/AWSApplicationMigrationReadOnlyAccess

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AWSApplicationMigrationReplicationServerPolicy

Description: This policy allows the Application Migration Service (MGN) Replication Servers, which are EC2 instances launched by Application Migration Service - to communicate with the MGN service, and to create EBS snapshots in your AWS account. An IAM role with this policy is attached (as an EC2 Instance Profile) by Application Migration Service to the MGN Replication Servers which are automatically launched and terminated by MGN, as needed. MGN Replication Servers are used to facilitate data replication from your external servers to AWS, as part of the migration process managed using MGN. We do not recommend that you attach this policy to your IAM users or roles.

AWSApplicationMigrationReplicationServerPolicy is an [AWS managed policy](#).

Using this policy

You can attach AWSApplicationMigrationReplicationServerPolicy to your users, groups, and roles.

Policy details

- **Type:** Service role policy

- **Creation time:** April 07, 2021, 07:21 UTC
- **Edited time:** April 07, 2021, 07:21 UTC

AWSApplicationMigrationServiceEc2InstancePolicy

Description: This policy allows installing and using the AWS Replication Agent, which is used by AWS Application Migration Service (AWS MGN) to migrate source servers that run on EC2 (cross-Region or cross-AZ). An IAM role with this policy should be attached (as an EC2 Instance Profile) to the EC2 Instances.

AWSApplicationMigrationServiceEc2InstancePolicy is an [AWS managed policy](#).

Using this policy

You can attach AWSApplicationMigrationServiceEc2InstancePolicy to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** August 22, 2023, 13:19 UTC
- **Edited time:** January 03, 2024, 14:19 UTC
- **ARN:** `arn:aws:iam::aws:policy/AWSApplicationMigrationServiceEc2InstancePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWSApplicationMigrationServiceRolePolicy

Description: Allows AWS application Migration Service to create and manage AWS resources on your behalf.

AWSApplicationMigrationServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** April 07, 2021, 06:43 UTC
- **Edited time:** January 08, 2025, 09:22 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AWSApplicationMigrationServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWSApplicationMigrationSSMAccess

Description: This policy provides access to Amazon SSM operations required to use Application Migration Service (MGN) to execute custom post migration command SSM documents. Attach this policy to your IAM users or roles.

AWSApplicationMigrationSSMAccess is an [AWS managed policy](#).

Using this policy

You can attach AWSApplicationMigrationSSMAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 27, 2022, 09:29 UTC
- **Edited time:** March 20, 2023, 10:57 UTC
- **ARN:** arn:aws:iam::aws:policy/AWSApplicationMigrationSSMAccess

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",

Policy details

- **Type:** Service role policy
- **Creation time:** May 14, 2021, 19:17 UTC
- **Edited time:** May 14, 2021, 19:17 UTC
- **ARN:** `arn:aws:iam::aws:policy/service-role/AWSAppRunnerServicePolicyForECRAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ecr:GetDownloadUrlForLayer",
        "ecr:BatchGetImage",
        "ecr:DescribeImages",
        "ecr:GetAuthorizationToken",
        "ecr:BatchCheckLayerAvailability"
      ],
      "Resource" : "*"
    }
  ]
}
```

AWSAppSyncAdministrator

Description: Provides administrative access to the AppSync service, though not enough to access via the console.

AWSAppSyncAdministrator is an [AWS managed policy](#).

Using this policy

You can attach AWSAppSyncAdministrator to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** March 20, 2018, 21:20 UTC
- **Edited time:** November 04, 2019, 19:23 UTC
- **ARN:** arn:aws:iam::aws:policy/AWSAppSyncAdministrator

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "appsync:*"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "iam:PassRole"
      ],
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "iam:PassedToService" : [
            "appsync.amazonaws.com"
          ]
        }
      }
    }
  ]
}
```

```
    },
    {

AWSAppSyncServiceRolePolicy

Description: Enables access to AWS services and resources used or managed by AppSync

AWSAppSyncServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** January 21, 2020, 19:56 UTC
- **Edited time:** January 21, 2020, 19:56 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AWSAppSyncServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
"Version" : "2012-10-17",

AWSAuditManagerServiceRolePolicy

Description: Enables access to AWS services and Resources used or managed by AWS Audit Manager

AWSAuditManagerServiceRolePolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** December 08, 2020, 15:12 UTC
- **Edited time:** September 24, 2024, 23:22 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AWSAuditManagerServiceRolePolicy`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWSAutoScalingPlansEC2AutoScalingPolicy

Description: Policy granting permissions to AWS Auto Scaling to periodically forecast capacity and generate scheduled scaling actions for Auto Scaling groups in a scaling plan

AWSAutoScalingPlansEC2AutoScalingPolicy is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** August 23, 2018, 22:46 UTC
- **Edited time:** August 23, 2018, 22:46 UTC
- **ARN:** arn:aws:iam::aws:policy/aws-service-role/AWSAutoScalingPlansEC2AutoScalingPolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",

AWSBackupAuditAccess

Description: This policy grants permissions for users to create controls and frameworks that define their expectations for AWS Backup resources and activities, and to audit AWS Backup resources and activities against their defined controls and frameworks. This policy grants permissions to AWS Config and similar services to describe user expectations perform the audits. This policy also grants

permissions to deliver audit reports to S3 and similar services, and enables users to find and open their audit reports.

AWSBackupAuditAccess is an [AWS managed policy](#).

Using this policy

You can attach AWSBackupAuditAccess to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** August 24, 2021, 01:02 UTC
- **Edited time:** April 10, 2023, 21:23 UTC
- **ARN:** arn:aws:iam::aws:policy/AWSBackupAuditAccess

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWSBackupGatewayServiceRolePolicyForVirtualMachineMetadataSync

Description: Provides AWS BackupGateway permission to sync the metadata of Virtual Machines on your behalf

AWSBackupGatewayServiceRolePolicyForVirtualMachineMetadataSync is an [AWS managed policy](#).

Using this policy

You can attach AWSBackupGatewayServiceRolePolicyForVirtualMachineMetadataSync to your users, groups, and roles.

Policy details

- **Type:** Service role policy
- **Creation time:** December 15, 2022, 19:43 UTC
- **Edited time:** December 15, 2022, 19:43 UTC
- **ARN:** `arn:aws:iam::aws:policy/service-role/AWSBackupGatewayServiceRolePolicyForVirtualMachineMetadataSync`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "ListVmTags",
      "Effect" : "Allow",
      "Action" : [
        "backup-gateway:ListTagsForResource"
      ],
      "Resource" : "arn:aws:backup-gateway:*:*:vm/*"
    },
    {
      "Sid" : "VMTagPermissions",
      "Effect" : "Allow",
      "Action" : [
        "backup-gateway:TagResource",
        "backup-gateway:UntagResource"
      ],
      "Resource" : "arn:aws:backup-gateway:*:*:vm/*"
    }
  ]
}
```

AWSBackupOperatorAccess

Description: This policy grants users permissions to assign AWS resources to backup plans, create on-demand backups, and restore backups. This policy does not allow the user to create or edit backup plans or to delete scheduled backups after they are created.

AWSBackupOperatorAccess is an [AWS managed policy](#).

Using this policy

You can attach `AWSBackupOperatorAccess` to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 18, 2019, 22:23 UTC
- **Edited time:** July 24, 2024, 18:58 UTC
- **ARN:** `arn:aws:iam::aws:policy/AWSBackupOperatorAccess`

Policy version

Policy version: v16 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWSBackupRestoreAccessForSAPHANA

Description: Provides AWS Backup permission to restore a backup of SAP HANA on Amazon EC2

AWSBackupRestoreAccessForSAPHANA is an [AWS managed policy](#).

Using this policy

You can attach AWSBackupRestoreAccessForSAPHANA to your users, groups, and roles.

Policy details

- **Type:** AWS managed policy
- **Creation time:** November 10, 2022, 22:43 UTC
- **Edited time:** November 10, 2022, 22:43 UTC
- **ARN:** arn:aws:iam::aws:policy/AWSBackupRestoreAccessForSAPHANA

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "backup:Get*",
        "backup:List*",
        "backup:Describe*",

AWSBackupServiceLinkedRolePolicyForBackup

Description: Provides AWS Backup permission to create backups on your behalf across AWS services

AWSBackupServiceLinkedRolePolicyForBackup is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** June 02, 2020, 23:08 UTC
- **Edited time:** January 07, 2025, 18:22 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AWSBackupServiceLinkedRolePolicyForBackup`

Policy version

Policy version: v17 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AWSBackupServiceLinkedRolePolicyForBackupTest

Description: Provides AWS Backup permission to create backups on your behalf across AWS services

AWSBackupServiceLinkedRolePolicyForBackupTest is an [AWS managed policy](#).

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type:** Service-linked role policy
- **Creation time:** May 12, 2020, 17:37 UTC
- **Edited time:** May 12, 2020, 17:37 UTC
- **ARN:** `arn:aws:iam::aws:policy/aws-service-role/AWSBackupServiceLinkedRolePolicyForBackupTest`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
