Welcome

AWS Cloud9 is a collection of tools that you can use to code, build, run, test, debug, and release software in the cloud.

For more information about AWS Cloud9, see the AWS Cloud9 User Guide.

AWS Cloud9 supports these operations:

- **CreateEnvironmentEC2**: Creates an AWS Cloud9 development environment, launches an Amazon EC2 instance, and then connects from the instance to the environment.
- **CreateEnvironmentMembership**: Adds an environment member to an environment.
- **DeleteEnvironment**: Deletes an environment. If an Amazon EC2 instance is connected to the environment, also terminates the instance.
- **DeleteEnvironmentMembership**: Deletes an environment member from an environment.
- **DescribeEnvironmentMemberships**: Gets information about environment members for an environment.
- **DescribeEnvironments**: Gets information about environments.
- **DescribeEnvironmentStatus**: Gets status information for an environment.
- **ListEnvironments**: Gets a list of environment identifiers.
- **UpdateEnvironment**: Changes the settings of an existing environment.
- **UpdateEnvironmentMembership**: Changes the settings of an existing environment member for an environment.

This document was last published on January 13, 2020.
Actions

The following actions are supported:

- CreateEnvironmentEC2 (p. 3)
- CreateEnvironmentMembership (p. 7)
- DeleteEnvironment (p. 11)
- DeleteEnvironmentMembership (p. 14)
- DescribeEnvironmentMemberships (p. 17)
- DescribeEnvironments (p. 23)
- DescribeEnvironmentStatus (p. 27)
- ListEnvironments (p. 30)
- UpdateEnvironment (p. 33)
- UpdateEnvironmentMembership (p. 36)
CreateEnvironmentEC2

Creates an AWS Cloud9 development environment, launches an Amazon Elastic Compute Cloud (Amazon EC2) instance, and then connects from the instance to the environment.

**Request Syntax**

```json
{
   "automaticStopTimeMinutes": number,
   "clientRequestToken": "string",
   "description": "string",
   "instanceType": "string",
   "name": "string",
   "ownerArn": "string",
   "subnetId": "string"
}
```

**Request Parameters**

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

**automaticStopTimeMinutes (p. 3)**

The number of minutes until the running instance is shut down after the environment has last been used.

Type: Integer

Valid Range: Maximum value of 20160.

Required: No

**clientRequestToken (p. 3)**

A unique, case-sensitive string that helps AWS Cloud9 to ensure this operation completes no more than one time.

For more information, see Client Tokens in the Amazon EC2 API Reference.

Type: String

Pattern: [\x20-\x7E]{10,128}

Required: No

**description (p. 3)**

The description of the environment to create.

Type: String

Length Constraints: Maximum length of 200.

Required: No

**instanceType (p. 3)**

The type of instance to connect to the environment (for example, t2.micro).
Type: String

Pattern: ^[a-z][1-9][.][a-z0-9]+$

Required: Yes

name (p. 3)

The name of the environment to create.

This name is visible to other AWS IAM users in the same AWS account.

Type: String

Length Constraints: Minimum length of 1. Maximum length of 60.

Required: Yes

ownerArn (p. 3)

The Amazon Resource Name (ARN) of the environment owner. This ARN can be the ARN of any AWS IAM principal. If this value is not specified, the ARN defaults to this environment's creator.

Type: String

Pattern: ^arn:aws:(iam|sts)::\d+:(root|(user/\[\w+=/:,.@-\]{1,64}|federated-user/\[\w+=/:,.@-\]{2,32}|assumed-role/\[\w+=/:,.@-\]\{1,64\})\{1,64\})$

Required: No

subnetId (p. 3)

The ID of the subnet in Amazon VPC that AWS Cloud9 will use to communicate with the Amazon EC2 instance.

Type: String

Required: No

Response Syntax

```
{
  "environmentId": "string"
}
```

Response Elements

If the action is successful, the service sends back an HTTP 200 response.

The following data is returned in JSON format by the service.

environmentId (p. 4)

The ID of the environment that was created.

Type: String
Errors

For information about the errors that are common to all actions, see Common Errors (p. 48).

**BadRequestException**

The target request is invalid.

HTTP Status Code: 400

**ConflictException**

A conflict occurred.

HTTP Status Code: 400

**ForbiddenException**

An access permissions issue occurred.

HTTP Status Code: 400

**InternalServerErrorException**

An internal server error occurred.

HTTP Status Code: 500

**LimitExceededException**

A service limit was exceeded.

HTTP Status Code: 400

**NotFoundException**

The target resource cannot be found.

HTTP Status Code: 400

**TooManyRequestsException**

Too many service requests were made over the given time period.

HTTP Status Code: 400

Example

The following example creates an AWS Cloud9 development environment with the specified settings.

**Sample Request**

```plaintext
POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
Content-Type: application/x-amz-json-1.1
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
X-Amz-Date: 20180123T224817Z
Content-Length: ...
```
API Version 2017-09-23

6
CreateEnvironmentMembership

Adds an environment member to an AWS Cloud9 development environment.

**Request Syntax**

```json
{
  "environmentId": "string",
  "permissions": "string",
  "userArn": "string"
}
```

**Request Parameters**

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

**environmentId (p. 7)**

The ID of the environment that contains the environment member you want to add.

Type: String

Pattern: ^[a-zA-Z0-9]{8,32}$

Required: Yes

**permissions (p. 7)**

The type of environment member permissions you want to associate with this environment member. Available values include:

- **read-only**: Has read-only access to the environment.
- **read-write**: Has read-write access to the environment.

Type: String

Valid Values: read-write | read-only

Required: Yes

**userArn (p. 7)**

The Amazon Resource Name (ARN) of the environment member you want to add.

Type: String

Pattern: ^arn:aws:(iam|sts)::\d+:root|\[user\]|\w+=/:,.@-\{1,64\}|federated-user\]|\w+=/:,.@-\{2,32\}|assumed-role\]|\w+=/:,.@-\{1,64\}|\w+=/:,.@-\{1,64\}$

Required: Yes

**Response Syntax**

```json
{
}
```
Response Elements

If the action is successful, the service sends back an HTTP 200 response.

The following data is returned in JSON format by the service.

**membership (p. 7)**

Information about the environment member that was added.

Type: EnvironmentMember (p. 44) object

Errors

For information about the errors that are common to all actions, see Common Errors (p. 48).

**BadRequestException**

The target request is invalid.

HTTP Status Code: 400

**ConflictException**

A conflict occurred.

HTTP Status Code: 400

**ForbiddenException**

An access permissions issue occurred.

HTTP Status Code: 400

**InternalServerException**

An internal server error occurred.

HTTP Status Code: 500

**LimitExceededException**

A service limit was exceeded.

HTTP Status Code: 400

**NotFoundException**

The target resource cannot be found.

HTTP Status Code: 400

**TooManyRequestsException**

Too many service requests were made over the given time period.
HTTP Status Code: 400

Example

The following example adds the specified environment member to the specified AWS Cloud9 development environment.

Sample Request

```plaintext
POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
Content-Type: application/x-amz-json-1.1
X-Amz-Date: 20180123T231127Z
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
X-Amz-Target: AWSCloud9WorkspaceManagementService.CreateEnvironmentMembership
Content-Length: ...
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target,
Signature=bb140cb4EXAMPLE

{
"environmentId": "8d9967e2f0624182b74e7690ad69ebEX",
"permissions": "read-write",
"userArn": "arn:aws:iam::123456789012:user/AnotherDemoUser"
}
```

Sample Response

```plaintext
HTTP/1.1 200 OK
Date: Tue, 23 Jan 2018 23:11:30 GMT
Content-Type: application/x-amz-json-1.1
Content-Length: 186
x-amzn-RequestId: beecb831-0092-11e8-84fe-c19e871c26EX
Connection: Keep-alive

{
"membership": {
  "environmentId": "8d9967e2f0624182b74e7690ad69ebEX",
  "permissions": "read-write",
  "userArn": "arn:aws:iam::123456789012:user/AnotherDemoUser",
  "userId": "AIDAJ3BA6O2FMJWCHXEX"
}
}
```

- AWS SDK for Java
- AWS SDK for JavaScript
• AWS SDK for PHP V3
• AWS SDK for Python
• AWS SDK for Ruby V2
DeleteEnvironment

Deletes an AWS Cloud9 development environment. If an Amazon EC2 instance is connected to the environment, also terminates the instance.

Request Syntax

```
{
  "environmentId": "string"
}
```

Request Parameters

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

environmentId (p. 11)

  The ID of the environment to delete.

  Type: String

  Pattern: ^[a-zA-Z0-9]{8,32}$

  Required: Yes

Response Elements

If the action is successful, the service sends back an HTTP 200 response with an empty HTTP body.

Errors

For information about the errors that are common to all actions, see Common Errors (p. 48).

BadRequestException

  The target request is invalid.

  HTTP Status Code: 400

ConflictException

  A conflict occurred.

  HTTP Status Code: 400

ForbiddenException

  An access permissions issue occurred.

  HTTP Status Code: 400

InternalServerErrorException

  An internal server error occurred.
HTTP Status Code: 500

**LimitExceededException**

A service limit was exceeded.

HTTP Status Code: 400

**NotFoundException**

The target resource cannot be found.

HTTP Status Code: 400

**TooManyRequestsException**

Too many service requests were made over the given time period.

HTTP Status Code: 400

**Example**

The following example deletes the specified AWS Cloud9 development environment.

**Sample Request**

```plaintext
POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/
cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target,
Signature=25619c96EX
X-Amz-Target: AWSCloud9WorkspaceManagementService.DeleteEnvironment
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
X-Amz-Date: 20180123T232227Z
Content-Type: application/x-amz-json-1.1
Content-Length: 53

{
    "environmentId": "8d9967e2f0624182b74e7690ad69ebEX"
}
```

**Sample Response**

```
HTTP/1.1 200 OK
Date: Tue, 23 Jan 2018 23:22:29 GMT
Content-Type: application/x-amz-json-1.1
Content-Length: 2
x-amzn-RequestId: 47682ed5-0094-11e8-9118-55255722b4EX
Connection: Keep-alive

{}
```

DeleteEnvironmentMembership

Deletes an environment member from an AWS Cloud9 development environment.

**Request Syntax**

```json
{
   "environmentId": "string",
   "userArn": "string"
}
```

**Request Parameters**

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

**environmentId (p. 14)**

The ID of the environment to delete the environment member from.

- **Type:** String
- **Pattern:** `^[a-zA-Z0-9]{8,32}$`
- **Required:** Yes

**userArn (p. 14)**

The Amazon Resource Name (ARN) of the environment member to delete from the environment.

- **Type:** String
- **Pattern:** `^arn:aws:(iam|sts)::\d+:\(root|\(user\/[\w+=/:,.@-]{1,64}\|federated-user\/[\w+=/:,.@-]{2,32}\|assumed-role\/[\w+=/:,.@-]{1,64}\)\/[\w+=/:,.@-]{1,64})*$`
- **Required:** Yes

**Response Elements**

If the action is successful, the service sends back an HTTP 200 response with an empty HTTP body.

**Errors**

For information about the errors that are common to all actions, see Common Errors (p. 48).

**BadRequestException**

The target request is invalid.

HTTP Status Code: 400

**ConflictException**

A conflict occurred.
HTTP Status Code: 400
**ForbiddenException**

An access permissions issue occurred.

HTTP Status Code: 400
**InternalServerErrorException**

An internal server error occurred.

HTTP Status Code: 500
**LimitExceededException**

A service limit was exceeded.

HTTP Status Code: 400
**NotFoundException**

The target resource cannot be found.

HTTP Status Code: 400
**TooManyRequestsException**

Too many service requests were made over the given time period.

HTTP Status Code: 400

Example

The following example deletes the specified environment member from the specified AWS Cloud9 development environment.

Sample Request

```plaintext
POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
X-Amz-Target: AWSCloud9WorkspaceManagementService.DeleteEnvironmentMembership
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target, Signature=3c6bbcb8EXAMPLE
Content-Type: application/x-amz-json-1.1
X-Amz-Date: 20180123T231959Z
Content-Length: ...

{
    "userArn": "arn:aws:iam::123456789012:user/AnotherDemoUser",
    "environmentId": "8d9967e2f0624182b74e7690ad69ebEX"
}
```

Sample Response

```
HTTP/1.1 200 OK
Date: Tue, 23 Jan 2018 23:20:00 GMT
Content-Type: application/x-amz-json-1.1
Content-Length: 2
```

DescribeEnvironmentMemberships

Gets information about environment members for an AWS Cloud9 development environment.

Request Syntax

```json
{
  "environmentId": "string",
  "maxResults": number,
  "nextToken": "string",
  "permissions": [ "string" ],
  "userArn": "string"
}
```

Request Parameters

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

**environmentId (p. 17)**

The ID of the environment to get environment member information about.

Type: String

Pattern: `^[a-zA-Z0-9]{8,32}$`

Required: No

**maxResults (p. 17)**

The maximum number of environment members to get information about.

Type: Integer

Valid Range: Minimum value of 0. Maximum value of 25.

Required: No

**nextToken (p. 17)**

During a previous call, if there are more than 25 items in the list, only the first 25 items are returned, along with a unique string called a next token. To get the next batch of items in the list, call this operation again, adding the next token to the call. To get all of the items in the list, keep calling this operation with each subsequent next token that is returned, until no more next tokens are returned.

Type: String

Required: No

**permissions (p. 17)**

The type of environment member permissions to get information about. Available values include:

- **owner**: Owns the environment.
- **read-only**: Has read-only access to the environment.
- **read-write**: Has read-write access to the environment.
If no value is specified, information about all environment members are returned.

Type: Array of strings

Valid Values: owner | read-write | read-only

Required: No

**userArn (p. 17)**

The Amazon Resource Name (ARN) of an individual environment member to get information about. If no value is specified, information about all environment members are returned.

Type: String

Pattern: ^arn:aws:(iam|sts)::\d+:(root|(user/\[\w+=/:,.@-]{1,64}|federated-user/\[\w+=/:,.@-]{2,32}|assumed-role/\[\w+=/:,.@-]{1,64}/\[\w+=/:,.@-]{1,64}))$*

Required: No

### Response Syntax

```json
{
  "memberships": [
    {
      "environmentId": "string",
      "lastAccess": number,
      "permissions": "string",
      "userArn": "string",
      "userId": "string"
    }
  ],
  "nextToken": "string"
}
```

### Response Elements

If the action is successful, the service sends back an HTTP 200 response.

The following data is returned in JSON format by the service.

**memberships (p. 18)**

Information about the environment members for the environment.

Type: Array of EnvironmentMember (p. 44) objects

**nextToken (p. 18)**

If there are more than 25 items in the list, only the first 25 items are returned, along with a unique string called a next token. To get the next batch of items in the list, call this operation again, adding the next token to the call.

Type: String

### Errors

For information about the errors that are common to all actions, see Common Errors (p. 48).
**BadRequestException**

The target request is invalid.

HTTP Status Code: 400

**ConflictException**

A conflict occurred.

HTTP Status Code: 400

**ForbiddenException**

An access permissions issue occurred.

HTTP Status Code: 400

**InternalServerErrorException**

An internal server error occurred.

HTTP Status Code: 500

**LimitExceededException**

A service limit was exceeded.

HTTP Status Code: 400

**NotFoundException**

The target resource cannot be found.

HTTP Status Code: 400

**TooManyRequestsException**

Too many service requests were made over the given time period.

HTTP Status Code: 400

---

**Examples**

**Get Environment Members for an AWS Cloud9 Development Environment**

The following example gets information about all of the environment members for the specified AWS Cloud9 development environment.

**Sample Request**

```plaintext
POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
X-Amz-Target: AWSCloud9WorkspaceManagementService.DescribeEnvironmentMemberships
Content-Type: application/x-amz-json-1.1
X-Amz-Date: 20180123T231253Z
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target, Signature=50dbf72dEXAMPLE
Content-Length: 53
```
{  "environmentId": "8d9967e2f0624182b74e7690ad69ebEX"}

Sample Response

HTTP/1.1 200 OK
Date: Tue, 23 Jan 2018 23:12:55 GMT
Content-Type: application/x-amz-json-1.1
Content-Length: 350
x-amzn-RequestId: f1680001-0092-11e8-a65b-093e8a557dEX
Connection: Keep-alive

{
    "memberships": [
    {
        "environmentId": "8d9967e2f0624182b74e7690ad69ebEX",
        "permissions": "read-write",
        "userArn": "arn:aws:iam::123456789012:user/AnotherDemoUser",
        "userId": "AIDAJ3BA602FMJWCWXHEX"
    },
    {
        "environmentId": "8d9967e2f0624182b74e7690ad69ebEX",
        "permissions": "owner",
        "userArn": "arn:aws:iam::123456789012:user/MyDemoUser",
        "userId": "AIDAJNUEDQAQWFELJDLEX"
    }
    ]
}

Get the Owner of an AWS Cloud9 Development Environment

The following example gets information about the owner of the specified AWS Cloud9 development environment.

Sample Request

POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
Content-Type: application/x-amz-json-1.1
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
X-Amz-Date: 20180123T231350Z
X-Amz-Target: AWSCloud9WorkspaceManagementService.DescribeEnvironmentMemberships

DescribeEnvironments

Gets information about AWS Cloud9 development environments.

Request Syntax

```json
{
   "environmentIds": [ "string" ]
}
```

Request Parameters

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

**environmentIds (p. 23)**

The IDs of individual environments to get information about.

- **Type:** Array of strings
- **Array Members:** Minimum number of 1 item. Maximum number of 25 items.
- **Pattern:** `^[a-zA-Z0-9]{8,32}$`
- **Required:** Yes

Response Syntax

```json
{
   "environments": [
      {
         "arn": "string",
         "description": "string",
         "id": "string",
         "lifecycle": {
            "failureResource": "string",
            "reason": "string",
            "status": "string"
         },
         "name": "string",
         "ownerArn": "string",
         "type": "string"
      }
   ]
}
```

Response Elements

If the action is successful, the service sends back an HTTP 200 response.

The following data is returned in JSON format by the service.
environments (p. 23)

Information about the environments that are returned.
Type: Array of Environment (p. 41) objects

Errors

For information about the errors that are common to all actions, see Common Errors (p. 48).

BadRequestException

The target request is invalid.
HTTP Status Code: 400

ConflictException

A conflict occurred.
HTTP Status Code: 400

ForbiddenException

An access permissions issue occurred.
HTTP Status Code: 400

InternalServerErrorException

An internal server error occurred.
HTTP Status Code: 500

LimitExceededException

A service limit was exceeded.
HTTP Status Code: 400

NotFoundException

The target resource cannot be found.
HTTP Status Code: 400

TooManyRequestsException

Too many service requests were made over the given time period.
HTTP Status Code: 400

Example

The following example gets information about the specified AWS Cloud9 development environments.

Sample Request

```
POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
X-Amz-Date: 20180123T225030Z
```
Content-Length: 92
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target, Signature=ca32a303EXAMPLE
Content-Type: application/x-amz-json-1.1
X-Amz-Target: AWSCloud9WorkspaceManagementService.DescribeEnvironments
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
{

DescribeEnvironmentStatus

Gets status information for an AWS Cloud9 development environment.

Request Syntax

```
{
  "environmentId": "string"
}
```

Request Parameters

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

**environmentId (p. 27)**

The ID of the environment to get status information about.

Type: String

Pattern: ^[a-zA-Z0-9]{8,32}$

Required: Yes

Response Syntax

```
{
  "message": "string",
  "status": "string"
}
```

Response Elements

If the action is successful, the service sends back an HTTP 200 response.

The following data is returned in JSON format by the service.

**message (p. 27)**

Any informational message about the status of the environment.

Type: String

**status (p. 27)**

The status of the environment. Available values include:

- connecting: The environment is connecting.
- creating: The environment is being created.
- deleting: The environment is being deleted.
- error: The environment is in an error state.
• ready: The environment is ready.
• stopped: The environment is stopped.
• stopping: The environment is stopping.

Type: String

Valid Values: error | creating | connecting | ready | stopping | stopped | deleting

Errors

For information about the errors that are common to all actions, see Common Errors (p. 48).

BadRequestException

The target request is invalid.

HTTP Status Code: 400

ConflicException

A conflict occurred.

HTTP Status Code: 400

ForbiddenException

An access permissions issue occurred.

HTTP Status Code: 400

InternalServerErrorException

An internal server error occurred.

HTTP Status Code: 500

LimitExceedededException

A service limit was exceeded.

HTTP Status Code: 400

NotFoundException

The target resource cannot be found.

HTTP Status Code: 400

TooManyRequestsException

Too many service requests were made over the given time period.

HTTP Status Code: 400

Example

The following example gets status information about the specified AWS Cloud9 development environment.
Sample Request

POST / HTTP/1.1  
Host: cloud9.us-east-2.amazonaws.com  
Accept-Encoding: identity  
X-Amz-Date: 20180123T225304Z  
X-Amz-Target: AWSCloud9WorkspaceManagementService.DescribeEnvironmentStatus  
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33  
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target, Signature=5e458ca5EXAMPLE  
Content-Length: 53  
Content-Type: application/x-amz-json-1.1

```json
{
  "environmentId": "8d9967e2f0624182b74e7690ad69ebEX"
}
```

Sample Response

HTTP/1.1 200 OK  
Date: Tue, 23 Jan 2018 22:53:07 GMT  
Content-Type: application/x-amz-json-1.1  
Content-Length: 58  
x-amzn-RequestId: 2cd6dfae-0090-11e8-a542-51fd7a14e1EX  
Connection: Keep-alive

```json
{
  "message": "Environment is ready to use",
  "status": "ready"
}
```

See Also

ListEnvironments

Gets a list of AWS Cloud9 development environment identifiers.

Request Syntax

```json
{
    "maxResults": number,
    "nextToken": "string"
}
```

Request Parameters

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

**maxResults (p. 30)**

The maximum number of environments to get identifiers for.

- Type: Integer
- Valid Range: Minimum value of 0. Maximum value of 25.
- Required: No

**nextToken (p. 30)**

During a previous call, if there are more than 25 items in the list, only the first 25 items are returned, along with a unique string called a next token. To get the next batch of items in the list, call this operation again, adding the next token to the call. To get all of the items in the list, keep calling this operation with each subsequent next token that is returned, until no more next tokens are returned.

- Type: String
- Required: No

Response Syntax

```json
{
    "environmentIds": [ "string" ],
    "nextToken": "string"
}
```

Response Elements

If the action is successful, the service sends back an HTTP 200 response.

The following data is returned in JSON format by the service.

**environmentIds (p. 30)**

The list of environment identifiers.
Errors

For information about the errors that are common to all actions, see Common Errors (p. 48).

**BadRequestException**

The target request is invalid.

HTTP Status Code: 400

**ConflictException**

A conflict occurred.

HTTP Status Code: 400

**ForbiddenException**

An access permissions issue occurred.

HTTP Status Code: 400

**InternalServerErrorCode**

An internal server error occurred.

HTTP Status Code: 500

**LimitExceededException**

A service limit was exceeded.

HTTP Status Code: 400

**NotFoundException**

The target resource cannot be found.

HTTP Status Code: 400

**TooManyRequestsException**

Too many service requests were made over the given time period.

HTTP Status Code: 400

Example

The following example gets the IDs of available AWS Cloud9 development environments.
Sample Request

POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
X-Amz-Target: AWSCloud9WorkspaceManagementService.ListEnvironments
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target,
X-Amz-Date: 20180123T223531Z
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
Content-Type: application/x-amz-json-1.1
Content-Length: 2
{}

Sample Response

HTTP/1.1 200 OK
Date: Tue, 23 Jan 2018 22:35:34 GMT
Content-Type: application/x-amz-json-1.1
Content-Length: 230
x-amzn-RequestId: b9b13fd3-008d-11e8-a65b-093e8a557dEX
Connection: Keep-alive
{
  "environmentIds": [
    "349c86d4579e4e7298d57a6b2EX",
    "45a3da47af0840f2b0c0824f5ee232EX"
  ]
}

UpdateEnvironment

Changes the settings of an existing AWS Cloud9 development environment.

Request Syntax

```json
{
   "description": "string",
   "environmentId": "string",
   "name": "string"
}
```

Request Parameters

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

**description (p. 33)**

Any new or replacement description for the environment.

Type: String

Length Constraints: Maximum length of 200.

Required: No

**environmentId (p. 33)**

The ID of the environment to change settings.

Type: String

Pattern: \^[a-zA-Z0-9]{8,32}\$

Required: Yes

**name (p. 33)**

A replacement name for the environment.

Type: String

Length Constraints: Minimum length of 1. Maximum length of 60.

Required: No

Response Elements

If the action is successful, the service sends back an HTTP 200 response with an empty HTTP body.

Errors

For information about the errors that are common to all actions, see Common Errors (p. 48).
AWS Cloud9 API Reference

Example

**BadRequestException**

The target request is invalid.

HTTP Status Code: 400

**ConflictException**

A conflict occurred.

HTTP Status Code: 400

**ForbiddenException**

An access permissions issue occurred.

HTTP Status Code: 400

**InternalServerException**

An internal server error occurred.

HTTP Status Code: 500

**LimitExceededException**

A service limit was exceeded.

HTTP Status Code: 400

**NotFoundException**

The target resource cannot be found.

HTTP Status Code: 400

**TooManyRequestsException**

Too many service requests were made over the given time period.

HTTP Status Code: 400

**Example**

The following example changes information about the specified AWS Cloud9 development environment.

**Sample Request**

```
POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
Content-Length: 140
X-Amz-Date: 20180123T232132Z
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
X-Amz-Target: AWSCloud9WorkspaceManagementService.UpdateEnvironment
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target,
Signature=280d6dbaEXAMPLE
Content-Type: application/x-amz-json-1.1

{
    "name": "my-changed-demo-environment",
    "description": "This is my changed demonstration environment."
}
```

API Version 2017-09-23

34
Sample Response

HTTP/1.1 200 OK
Date: Tue, 23 Jan 2018 23:21:33 GMT
Content-Type: application/x-amz-json-1.1
Content-Length: 2
x-amzn-RequestId: 26985f72-0094-11e8-abf2-0b9c8171c5EX

UpdateEnvironmentMembership

Changes the settings of an existing environment member for an AWS Cloud9 development environment.

**Request Syntax**

```json
{
    "environmentId": "string",
    "permissions": "string",
    "userArn": "string"
}
```

**Request Parameters**

For information about the parameters that are common to all actions, see Common Parameters (p. 46).

The request accepts the following data in JSON format.

- **environmentId (p. 36)**
  
  The ID of the environment for the environment member whose settings you want to change.
  
  Type: String
  
  Pattern: ^[a-zA-Z0-9]{8,32}$
  
  Required: Yes

- **permissions (p. 36)**
  
  The replacement type of environment member permissions you want to associate with this environment member. Available values include:
  
  - read-only: Has read-only access to the environment.
  - read-write: Has read-write access to the environment.
  
  Type: String
  
  Valid Values: read-write | read-only
  
  Required: Yes

- **userArn (p. 36)**
  
  The Amazon Resource Name (ARN) of the environment member whose settings you want to change.
  
  Type: String
  
  Pattern: ^arn:aws:(iam|sts)::\d+:(root|(user\/[\w+=/:,.@-]{1,64}|federated-user\/[\w+=/:,.@-]{2,32}|assumed-role\/[\w+=/:,.@-]{1,64}/[\w+=/:,.@-]{1,64})$*
  
  Required: Yes

**Response Syntax**

```json```
```
"membership": {
    "environmentId": "string",
    "lastAccess": number,
    "permissions": "string",
    "userArn": "string",
    "userId": "string"
  }
}

Response Elements

If the action is successful, the service sends back an HTTP 200 response.

The following data is returned in JSON format by the service.

**membership (p. 36)**

Information about the environment member whose settings were changed.

Type: `EnvironmentMember (p. 44)` object

Errors

For information about the errors that are common to all actions, see `Common Errors (p. 48)`.

**BadRequestException**

The target request is invalid.

HTTP Status Code: 400

**ConflictException**

A conflict occurred.

HTTP Status Code: 400

**ForbiddenException**

An access permissions issue occurred.

HTTP Status Code: 400

**InternalServerException**

An internal server error occurred.

HTTP Status Code: 500

**LimitExceededException**

A service limit was exceeded.

HTTP Status Code: 400

**NotFoundException**

The target resource cannot be found.

HTTP Status Code: 400

**TooManyRequestsException**

Too many service requests were made over the given time period.
HTTP Status Code: 400

Example

The following example changes membership status of the specified environment member for the specified AWS Cloud9 development environment.

Sample Request

POST / HTTP/1.1
Host: cloud9.us-east-2.amazonaws.com
Accept-Encoding: identity
Content-Type: application/x-amz-json-1.1
Authorization: AWS4-HMAC-SHA256 Credential=AKIAJ32OEXAMPLE/20180123/us-east-2/cloud9/aws4_request, SignedHeaders=content-type;host;x-amz-date;x-amz-target,
Signature=f65b7aadEXAMPLE
User-Agent: aws-cli/1.14.29 Python/3.5.2 Windows/10 botocore/1.8.33
Content-Length: 142
X-Amz-Target: AWSCloud9WorkspaceManagementService.UpdateEnvironmentMembership
X-Amz-Date: 20180123T231840Z
{
  "userArn": "arn:aws:iam::123456789012:user/AnotherDemoUser",
  "permissions": "read-only",
  "environmentId": "8d9967e2f0624182b74e7690ad69ebEX"
}

Sample Response

HTTP/1.1 200 OK
Date: Tue, 23 Jan 2018 23:18:41 GMT
Content-Type: application/x-amz-json-1.1
Content-Length: 185
x-amzn-RequestId: c015da39-0093-11e8-87b5-3915a8b12eEXAMPLE
Connection: Keep-alive
{
  "membership": {
    "environmentId": "8d9967e2f0624182b74e7690ad69eb31",
    "permissions": "read-only",
    "userArn": "arn:aws:iam::123456789012:user/AnotherDemoUser",
    "userId": "AIDAJ3BA6O2FMJWCWXEXAMPLE"
  }
}

The AWS Cloud9 API contains several data types that various actions use. This section describes each data type in detail.

**Note**
The order of each element in a data type structure is not guaranteed. Applications should not assume a particular order.

The following data types are supported:

- Environment (p. 41)
- EnvironmentLifecycle (p. 43)
- EnvironmentMember (p. 44)
Environment

Information about an AWS Cloud9 development environment.

Contents

**arn**

The Amazon Resource Name (ARN) of the environment.

Type: String

Required: No

**description**

The description for the environment.

Type: String

Length Constraints: Maximum length of 200.

Required: No

**id**

The ID of the environment.

Type: String

Pattern: `^[a-zA-Z0-9]{8,32}$`

Required: No

**lifecycle**

The state of the environment in its creation or deletion lifecycle.

Type: `EnvironmentLifecycle (p. 43)` object

Required: No

**name**

The name of the environment.

Type: String

Length Constraints: Minimum length of 1. Maximum length of 60.

Required: No

**ownerArn**

The Amazon Resource Name (ARN) of the environment owner.

Type: String

Required: No

**type**

The type of environment. Valid values include the following:

- `ec2`: An Amazon Elastic Compute Cloud (Amazon EC2) instance connects to the environment.
• ssh: Your own server connects to the environment.

Type: String

Valid Values: ssh | ec2

Required: No

See Also

For more information about using this API in one of the language-specific AWS SDKs, see the following:

• AWS SDK for C++
• AWS SDK for Go
• AWS SDK for Java
• AWS SDK for Ruby V2
EnvironmentLifecycle

Information about the current creation or deletion lifecycle state of an AWS Cloud9 development environment.

Contents

failureResource

If the environment failed to delete, the Amazon Resource Name (ARN) of the related AWS resource.

Type: String
Required: No

reason

Any informational message about the lifecycle state of the environment.

Type: String
Required: No

status

The current creation or deletion lifecycle state of the environment.

• CREATING: The environment is in the process of being created.
• CREATED: The environment was successfully created.
• CREATE_FAILED: The environment failed to be created.
• DELETING: The environment is in the process of being deleted.
• DELETE_FAILED: The environment failed to delete.

Type: String

Valid Values: CREATING | CREATED | CREATE_FAILED | DELETING | DELETE_FAILED

Required: No

• AWS SDK for C++
• AWS SDK for Go
• AWS SDK for Java
• AWS SDK for Ruby V2
EnvironmentMember

Information about an environment member for an AWS Cloud9 development environment.

Contents

environmentId

The ID of the environment for the environment member.

Type: String

Pattern: ^[a-zA-Z0-9]{8,32}$

Required: No

lastAccess

The time, expressed in epoch time format, when the environment member last opened the environment.

Type: Timestamp

Required: No

permissions

The type of environment member permissions associated with this environment member. Available values include:

- **owner**: Owns the environment.
- **read-only**: Has read-only access to the environment.
- **read-write**: Has read-write access to the environment.

Type: String

Valid Values: owner | read-write | read-only

Required: No

userArn

The Amazon Resource Name (ARN) of the environment member.

Type: String

Pattern: ^arn:aws:(iam|sts)::\d+:\{root|\{user\}/\{w+=/\},\,-\}\{1,64\}\{federated-user\}/\{w+=/\},\,-\}\{2,32\}\{assumed-role\}/\{w+=/\},\,-\}\{1,64\}\{w+=/\},\,-\}\{1,64\}$

Required: No

userId

The user ID in AWS Identity and Access Management (AWS IAM) of the environment member.

Type: String

Required: No

- AWS SDK for C++
- AWS SDK for Go
- AWS SDK for Java
- AWS SDK for Ruby V2
Common Parameters

The following list contains the parameters that all actions use for signing Signature Version 4 requests with a query string. Any action-specific parameters are listed in the topic for that action. For more information about Signature Version 4, see Signature Version 4 Signing Process in the Amazon Web Services General Reference.

**Action**

The action to be performed.

Type: string  
Required: Yes

**Version**

The API version that the request is written for, expressed in the format YYYY-MM-DD.

Type: string  
Required: Yes

**X-Amz-Algorithm**

The hash algorithm that you used to create the request signature.

Condition: Specify this parameter when you include authentication information in a query string instead of in the HTTP authorization header.

Type: string  
Valid Values: AWS4-HMAC-SHA256

Required: Conditional

**X-Amz-Credential**

The credential scope value, which is a string that includes your access key, the date, the region you are targeting, the service you are requesting, and a termination string ("aws4_request"). The value is expressed in the following format: access_key/YYYYMMDD/region/service/aws4_request.

For more information, see Task 2: Create a String to Sign for Signature Version 4 in the Amazon Web Services General Reference.

Condition: Specify this parameter when you include authentication information in a query string instead of in the HTTP authorization header.

Type: string  
Required: Conditional

**X-Amz-Date**

The date that is used to create the signature. The format must be ISO 8601 basic format ("YYYYMMDD'T'HHMMSS'Z"). For example, the following date time is a valid X-Amz-Date value: 20120325T120000Z.

Condition: X-Amz-Date is optional for all requests; it can be used to override the date used for signing requests. If the Date header is specified in the ISO 8601 basic format, X-Amz-Date is
not required. When X-Amz-Date is used, it always overrides the value of the Date header. For more information, see Handling Dates in Signature Version 4 in the Amazon Web Services General Reference.

Type: string
Required: Conditional

X-Amz-Security-Token

The temporary security token that was obtained through a call to AWS Security Token Service (AWS STS). For a list of services that support temporary security credentials from AWS Security Token Service, go to AWS Services That Work with IAM in the IAM User Guide.

Condition: If you're using temporary security credentials from the AWS Security Token Service, you must include the security token.

Type: string
Required: Conditional

X-Amz-Signature

Specifies the hex-encoded signature that was calculated from the string to sign and the derived signing key.

Condition: Specify this parameter when you include authentication information in a query string instead of in the HTTP authorization header.

Type: string
Required: Conditional

X-Amz-SignedHeaders

Specifies all the HTTP headers that were included as part of the canonical request. For more information about specifying signed headers, see Task 1: Create a Canonical Request For Signature Version 4 in the Amazon Web Services General Reference.

Condition: Specify this parameter when you include authentication information in a query string instead of in the HTTP authorization header.

Type: string
Required: Conditional
Common Errors

This section lists the errors common to the API actions of all AWS services. For errors specific to an API action for this service, see the topic for that API action.

**AccessDeniedException**
You do not have sufficient access to perform this action.
HTTP Status Code: 400

**IncompleteSignature**
The request signature does not conform to AWS standards.
HTTP Status Code: 400

**InternalFailure**
The request processing has failed because of an unknown error, exception or failure.
HTTP Status Code: 500

**InvalidAction**
The action or operation requested is invalid. Verify that the action is typed correctly.
HTTP Status Code: 400

**InvalidClientTokenId**
The X.509 certificate or AWS access key ID provided does not exist in our records.
HTTP Status Code: 403

**InvalidParameterCombination**
Parameters that must not be used together were used together.
HTTP Status Code: 400

**InvalidParameterValue**
An invalid or out-of-range value was supplied for the input parameter.
HTTP Status Code: 400

**InvalidQueryParameter**
The AWS query string is malformed or does not adhere to AWS standards.
HTTP Status Code: 400

**MalformedQueryString**
The query string contains a syntax error.
HTTP Status Code: 404

**MissingAction**
The request is missing an action or a required parameter.
HTTP Status Code: 400
**MissingAuthenticationToken**

The request must contain either a valid (registered) AWS access key ID or X.509 certificate.

HTTP Status Code: 403

**MissingParameter**

A required parameter for the specified action is not supplied.

HTTP Status Code: 400

**OptInRequired**

The AWS access key ID needs a subscription for the service.

HTTP Status Code: 403

**RequestExpired**

The request reached the service more than 15 minutes after the date stamp on the request or more than 15 minutes after the request expiration date (such as for pre-signed URLs), or the date stamp on the request is more than 15 minutes in the future.

HTTP Status Code: 400

**ServiceUnavailable**

The request has failed due to a temporary failure of the server.

HTTP Status Code: 503

**ThrottlingException**

The request was denied due to request throttling.

HTTP Status Code: 400

**ValidationException**

The input fails to satisfy the constraints specified by an AWS service.

HTTP Status Code: 400
