AWS Managed Policy: Reference Guide

Copyright © 2025 Amazon Web Services, Inc. and/or its affiliates. All rights reserved.

Amazon's trademarks and trade dress may not be used in connection with any product or service that is not Amazon's, in any manner that is likely to cause confusion among customers, or in any manner that disparages or discredits Amazon. All other trademarks not owned by Amazon are the property of their respective owners, who may or may not be affiliated with, connected to, or sponsored by Amazon.

What are AWS managed policies?

An AWS managed policy is a standalone policy that is created and administered by AWS. AWS managed policies are designed to provide permissions for many common use cases. They make it easier for you to get started with assigning permissions to users, groups, and roles than if you had to write the policies yourself.

Keep in mind that AWS managed policies might not grant least-privilege permissions for your specific use cases because they are available for use by all AWS customers. We recommend that you reduce permissions further by defining customer managed policies that are specific to your use cases.

You cannot change the permissions defined in AWS managed policies. If AWS updates the permissions defined in an AWS managed policy, the update affects all principal identities (users, groups, and roles) that the policy is attached to. AWS is most likely to update an AWS managed policy when a new AWS service is launched or new API operations become available for existing services.

For more information, see AWS managed policies in the IAM User Guide.

Understanding policy reference pages

Each policy reference page includes the following information:

- **Using this policy** – Whether you can attach the policy to users, groups, and roles
- **Policy details**
  - **Type** – The type of AWS managed policy
    - `AWS managed policy` – A standard AWS managed policy
    - `Job function policy` – Policy that aligns with common industry job functions
    - `Service-linked role policy` – Policy that is attached to a service-linked role that allows a service to perform actions on your behalf, such as the section called "AmazonRDSPreviewServiceRolePolicy"
    - `Service role policy` – Policy designed to work with service roles, such as the section called "AWSControlTowerServiceRolePolicy"
  - **Creation time** – When the policy was first created
  - **Edited time** – When this version of the policy was edited

  - **ARN** – The Amazon Resource Name of the policy
- **Policy version** – The version of the permissions granted by the policy
- **JSON policy document** – The policy JSON
- **Learn more** – Links to documentation related to AWS managed policies

Deprecated AWS managed policies

AWS regularly updates AWS managed policies. In most cases, we add permissions to a policy. This happens when we launch a new service or feature. To improve the security of AWS managed policies, we sometimes reduce the scope of policies. When we remove permissions from a policy, we set the policy to a *deprecated* state and make a new one available. When AWS deprecates a service or feature, we also deprecate the AWS managed policy for that feature.

If you receive an email notification that a policy you are using is deprecated, we recommend that you immediately take action. Identify the change to the policy and update your workflows. If AWS provides a replacement policy, plan to attach it to all affected identities (users, groups, and roles) and then detach the deprecated policy from those identities.

A deprecated policy has the following characteristics:

- It is removed from this guide.
- Permissions continue to work for all *currently* attached identities.
- In accounts where the policy is attached to an identity, it appears in the **Policies** list in the IAM console with a warning icon next to it.
- It *cannot* be attached to any new identities. If you detach it from a current identity, you cannot reattach it.
- After you detach it from all current entities, it is no longer visible.

AccessAnalyzerServiceRolePolicy

Description: Allow Access Analyzer to analyze resource metadata

`AccessAnalyzerServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: December 02, 2019, 17:13 UTC
- **Edited time:** May 12, 2025, 15:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AccessAnalyzerServiceRolePolicy`

Policy version

Policy version: v17 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

Learn more

- Understand versioning for IAM policies
- Get started with AWS managed policies and move toward least-privilege permissions

AdministratorAccess

Description: Provides full access to AWS services and resources.

`AdministratorAccess` is an AWS managed policy.

Using this policy

You can attach `AdministratorAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:39 UTC
- **Edited time:** February 06, 2015, 18:39 UTC
- **ARN**: `arn:aws:iam::aws:policy/AdministratorAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "*",
      "Resource" : "*"
    }
  ]
}
```

AdministratorAccess-Amplify

Description: Grants account administrative permissions while explicitly allowing direct access to resources needed by Amplify applications.

`AdministratorAccess-Amplify` is an AWS managed policy.

Using this policy

You can attach `AdministratorAccess-Amplify` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 01, 2020, 19:03 UTC
- **Edited time:** April 04, 2024, 20:35 UTC
- **ARN**: `arn:aws:iam::aws:policy/AdministratorAccess-Amplify`

Policy version

Policy version: v12 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AdministratorAccess-AWSElasticBeanstalk

Description: Grants account administrative permissions. Explicitly allows developers and administrators to gain direct access to resources they need to manage AWS Elastic Beanstalk applications

`AdministratorAccess-AWSElasticBeanstalk` is an AWS managed policy.

Using this policy

You can attach `AdministratorAccess-AWSElasticBeanstalk` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 22, 2021, 19:36 UTC
- **Edited time:** December 11, 2024, 14:36 UTC
- **ARN**: `arn:aws:iam::aws:policy/AdministratorAccess-AWSElasticBeanstalk`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AIOpsAssistantPolicy

Description: Provides ReadOnly permissions required by the Amazon AI Operations Assistant to do analysis on customer AWS resources during investigations.

`AIOpsAssistantPolicy` is an AWS managed policy.

Using this policy

You can attach `AIOpsAssistantPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 02, 2024, 16:21 UTC
- **Edited time:** April 03, 2025, 22:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIOpsAssistantPolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AIOpsConsoleAdminPolicy

Description: Grants full access to Amazon AI Operations service and its required permissions via AWS console. It also includes permissions to use identity-aware console sessions.

`AIOpsConsoleAdminPolicy` is an AWS managed policy.

Using this policy

You can attach `AIOpsConsoleAdminPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 02, 2024, 23:51 UTC
- **Edited time:** June 24, 2025, 00:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIOpsConsoleAdminPolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AIOpsOperatorAccess

Description: Grants access to the Amazon AI Operations APIs for creating, updating, and deleting investigations, investigation events, and investigation resources. It also includes ReadOnly access to all AI Operations APIs and to use identity-aware sessions.

`AIOpsOperatorAccess` is an AWS managed policy.

Using this policy

You can attach `AIOpsOperatorAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 02, 2024, 23:51 UTC
- **Edited time:** June 24, 2025, 00:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIOpsOperatorAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AlexaForBusinessDeviceSetup

Description: Provide device setup access to AlexaForBusiness services

`AlexaForBusinessDeviceSetup` is an AWS managed policy.

Using this policy

You can attach `AlexaForBusinessDeviceSetup` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 30, 2017, 16:47 UTC
- **Edited time:** May 20, 2019, 21:05 UTC
- **ARN**: `arn:aws:iam::aws:policy/AlexaForBusinessDeviceSetup`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "a4b:RegisterDevice",
        "a4b:CompleteRegistration",
        "a4b:SearchDevices",
        "a4b:SearchNetworkProfiles",
```

```
        "a4b:GetNetworkProfile",
        "a4b:PutDeviceSetupEvents"
      ],
      "Resource" : "*"
    },
    {

AlexaForBusinessFullAccess

Description: Grants full access to AlexaForBusiness resources and access to related AWS services

`AlexaForBusinessFullAccess` is an AWS managed policy.

Using this policy

You can attach `AlexaForBusinessFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 30, 2017, 16:47 UTC
- **Edited time:** July 01, 2020, 21:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/AlexaForBusinessFullAccess`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AlexaForBusinessNetworkProfileServicePolicy

Description: This policy enables Alexa for Business to perform automated tasks scheduled by your network profiles.

`AlexaForBusinessNetworkProfileServicePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy

- **Creation time**: March 13, 2019, 00:53 UTC
- **Edited time:** April 05, 2019, 21:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AlexaForBusinessNetworkProfileServicePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "A4bPcaTagAccess",
      "Action" : [
        "acm-pca:GetCertificate",
        "acm-pca:IssueCertificate",
        "acm-pca:RevokeCertificate"
      ],
      "Effect" : "Allow",
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceTag/a4b" : "enabled"
        }
      }
    },
    {
      "Sid" : "A4bNetworkProfileAccess",
      "Effect" : "Allow",
      "Action" : [
        "secretsmanager:GetSecretValue"
      ],

AlexaForBusinessPolyDelegatedAccessPolicy

Description: Provide access to Poly AVS devices

`AlexaForBusinessPolyDelegatedAccessPolicy` is an AWS managed policy.

Using this policy

You can attach `AlexaForBusinessPolyDelegatedAccessPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 16, 2019, 19:48 UTC
- **Edited time:** October 16, 2019, 19:48 UTC
- **ARN**: `arn:aws:iam::aws:policy/AlexaForBusinessPolyDelegatedAccessPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonAppStreamReadOnlyAccess

Description: Provides read only access to Amazon AppStream via the AWS Management Console.

`AmazonAppStreamReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonAppStreamReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** December 07, 2016, 21:00 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonAppStreamReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "appstream:Get*",
        "appstream:List*",
        "appstream:Describe*"
      ],
```

```
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonAppStreamServiceAccess

Description: Default policy for Amazon AppStream service role.

`AmazonAppStreamServiceAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonAppStreamServiceAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 19, 2016, 04:17 UTC
- **Edited time:** June 26, 2020, 16:33 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonAppStreamServiceAccess`

Policy version

Policy version: v8 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:DescribeVpcs",
        "ec2:DescribeSubnets",
        "ec2:DescribeAvailabilityZones",
        "ec2:CreateNetworkInterface",

AmazonAthenaFullAccess

Description: Provide full access to Amazon Athena and scoped access to the dependencies needed to enable querying, writing results, and data management.

`AmazonAthenaFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonAthenaFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 30, 2016, 16:46 UTC
- **Edited time:** January 03, 2025, 00:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonAthenaFullAccess`

Policy version

Policy version: v13 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonAugmentedAIFullAccess

Description: Provides access to perform all operations Amazon Augmented AI resources, including FlowDefinitions, HumanTaskUis and HumanLoops. Does not allow access for creating FlowDefinitions against the public-crowd Workteam.

`AmazonAugmentedAIFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonAugmentedAIFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: December 03, 2019, 16:21 UTC
- **Edited time:** December 03, 2019, 16:21 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonAugmentedAIFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonAuroraDSQLReadOnlyAccess

Description: Provides read only access to Aurora DSQL

`AmazonAuroraDSQLReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonAuroraDSQLReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 03, 2024, 15:21 UTC
- **Edited time:** May 14, 2025, 19:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonAuroraDSQLReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "DsqlReadOnlyPermissions",
      "Effect" : "Allow",

AmazonBedrockFullAccess

Description: Provides full access to Amazon Bedrock as well as limited access to related services that are required by it

`AmazonBedrockFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonBedrockFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 06, 2023, 15:47 UTC
- **Edited time:** June 29, 2025, 22:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonBedrockFullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonBedrockReadOnly

Description: Provides read only access to Amazon Bedrock

`AmazonBedrockReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonBedrockReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 06, 2023, 15:48 UTC
- **Edited time:** December 04, 2024, 19:36 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonBedrockReadOnly`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonBraketServiceRolePolicy

Description: Allows Amazon Braket to create and manage AWS resources on your behalf

`AmazonBraketServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: August 04, 2020, 17:12 UTC
- **Edited time:** July 11, 2025, 21:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonBraketServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
```

```
        "s3:PutObject",
        "s3:GetObject",
        "s3:ListBucket"
      ],
      "Resource" : "arn:aws:s3:::amazon-braket-*",
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
      }
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "logs:PutLogEvents",
        "logs:CreateLogStream",
        "logs:DescribeLogStreams",
        "logs:CreateLogGroup",
        "logs:DescribeLogGroups"
      ],
      "Resource" : "arn:aws:logs:*:*:log-group:/aws/braket:*",
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
      }
    }
  ]
}
```

AmazonChimeFullAccess

Description: Provides full access to Amazon Chime Admin Console via the AWS Management Console.

`AmazonChimeFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonChimeFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 01, 2017, 22:15 UTC
- **Edited time:** December 14, 2020, 21:00 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonChimeFullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{

AmazonChimeReadOnly

Description: Provides read only access to Amazon Chime Admin Console via the AWS Management Console.

`AmazonChimeReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonChimeReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 01, 2017, 22:04 UTC
- **Edited time:** December 14, 2020, 20:53 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonChimeReadOnly`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "chime:List*",
        "chime:Get*",
        "chime:Describe*",
        "chime:SearchAvailablePhoneNumbers"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonChimeSDK

Description: Provides access to Amazon Chime SDK operations

`AmazonChimeSDK` is an AWS managed policy.

Using this policy

You can attach `AmazonChimeSDK` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 04, 2020, 21:53 UTC
- **Edited time:** January 10, 2023, 18:05 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonChimeSDK`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
```

```
    {
      "Effect" : "Allow",
      "Action" : [
        "chime:CreateMeeting",
        "chime:CreateMeetingWithAttendees",

AmazonChimeVoiceConnectorServiceLinkedRolePolicy

Description: Managed policy for Service Linked Role for Amazon Chime VoiceConnector

`AmazonChimeVoiceConnectorServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: September 30, 2019, 22:16 UTC

- **Edited time:** April 14, 2023, 21:49 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonChimeVoiceConnectorServiceLinkedRolePolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {

AmazonCloudDirectoryFullAccess

Description: Provides full access to Amazon Cloud Directory Service.

`AmazonCloudDirectoryFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonCloudDirectoryFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 25, 2017, 00:41 UTC
- **Edited time:** February 25, 2017, 00:41 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonCloudDirectoryFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "clouddirectory:*"
      ],
      "Resource" : [
        "*"
      ]
    }
  ]
}
```

AmazonCodeCatalystFullAccess

Description: Provides full access to Amazon CodeCatalyst

`AmazonCodeCatalystFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonCodeCatalystFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 20, 2023, 16:50 UTC
- **Edited time:** April 20, 2023, 16:50 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonCodeCatalystFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonCognitoIdpEmailServiceRolePolicy

Description: Allows Amazon Cognito User Pools service to use your SES identities for email sending

`AmazonCognitoIdpEmailServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: March 21, 2019, 21:32 UTC
- **Edited time:** March 21, 2019, 21:32 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonCognitoIdpEmailServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ses:SendEmail",
        "ses:SendRawEmail"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Deny",
      "Action" : [
        "ses:List*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonCognitoUnAuthedIdentitiesSessionPolicy

Description: This policy defines the set of permissions allowed for unauthenticated identities for Cognito Identity Pools. This policy is not intended to be used as a stand alone permission policy.

It is used as a guardrail against overly permissive policies attached for roles in an identity pool. Do not attach this policy to any roles, as Cognito Identity Service will automatically include it as a scoped down policy when creating credentials. The privileges to temporarily access other AWS resources through the enhanced flow will now be defined by the intersection of the role associated with the identity of the unauthenticated user provided by a service, and the privileges given in this managed policy that is owned by Cognito.

`AmazonCognitoUnAuthedIdentitiesSessionPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonCognitoUnAuthedIdentitiesSessionPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 19, 2023, 23:04 UTC
- **Edited time:** November 01, 2024, 18:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonCognitoUnAuthedIdentitiesSessionPolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "CognitoUnAuthedIdentitiesSessionPolicy",
      "Effect" : "Allow",
```

```
      "Action" : [
        "rum:PutRumEvents",

AmazonConnectSynchronizationServiceRolePolicy

Description: Allows Amazon Connect to synchronize AWS resources across regions on your behalf.

`AmazonConnectSynchronizationServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy

- **Creation time**: October 27, 2023, 22:38 UTC
- **Edited time:** November 12, 2024, 22:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonConnectSynchronizationServiceRolePolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonConnectVoiceIDFullAccess

Description: Provides full access to Amazon Connect Voice ID

`AmazonConnectVoiceIDFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonConnectVoiceIDFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 26, 2021, 19:04 UTC
- **Edited time:** September 26, 2021, 19:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonConnectVoiceIDFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "voiceid:*",
      "Resource" : "*"
    }
  ]
}
```

AmazonDataZoneBedrockModelConsumptionPolicy

Description: Provides permissions to consume Amazon Bedrock models, including invoking Amazon Bedrock application inference profile created for particular Amazon DataZone domain.

`AmazonDataZoneBedrockModelConsumptionPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneBedrockModelConsumptionPolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 12, 2024, 22:15 UTC
- **Edited time:** May 28, 2025, 18:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonDataZoneBedrockModelConsumptionPolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneEnvironmentRolePermissionsBoundary

Description: Amazon DataZone creates IAM roles for Environments to perform data analytics actions, and uses this policy when creating these roles to define the boundary of their permissions.

`AmazonDataZoneEnvironmentRolePermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneEnvironmentRolePermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 11, 2023, 23:38 UTC
- **Edited time:** November 17, 2023, 23:29 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneEnvironmentRolePermissionsBoundary`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonDataZoneFullAccess

Description: Provides full access to Amazon DataZone via the AWS Management Console as well as limited access to related services that are required by it.

`AmazonDataZoneFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 22, 2023, 20:06 UTC
- **Edited time:** July 23, 2025, 19:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneFullAccess`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneFullUserAccess

Description: Provides full access to Amazon DataZone, but does not allow the management of domains, users, or associated accounts.

`AmazonDataZoneFullUserAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneFullUserAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 22, 2023, 21:06 UTC
- **Edited time:** November 19, 2024, 21:38 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneFullUserAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneGlueManageAccessRolePolicy

Description: The policy grants permissions to allow Amazon DataZone to enable publishing and access grants to data.

`AmazonDataZoneGlueManageAccessRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneGlueManageAccessRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: September 22, 2023, 20:21 UTC
- **Edited time:** June 19, 2025, 19:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonDataZoneGlueManageAccessRolePolicy`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZonePortalFullAccessPolicy

Description: Provides full access to Amazon DataZone APIs

`AmazonDataZonePortalFullAccessPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZonePortalFullAccessPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 26, 2023, 18:24 UTC
- **Edited time:** March 26, 2023, 18:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZonePortalFullAccessPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "datazonecontrol:*",
      "Resource" : "*"
    }
  ]
}
```

AmazonDataZonePreviewConsoleFullAccess

Description: Provides full access to the Preview release of Amazon DataZone via the AWS Management Console. Also provides select access to other related services.

`AmazonDataZonePreviewConsoleFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZonePreviewConsoleFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 28, 2023, 15:16 UTC
- **Edited time:** July 13, 2023, 18:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZonePreviewConsoleFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneProjectDeploymentPermissionsBoundary

Description: Amazon DataZone creates IAM roles that it uses for deploying data analytics projects. DataZone uses this policy when creating these roles to define the boundary of their permissions.

`AmazonDataZoneProjectDeploymentPermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneProjectDeploymentPermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 21, 2023, 02:54 UTC
- **Edited time:** April 04, 2023, 02:48 UTC

AmazonDataZoneProjectRolePermissionsBoundary

Description: Amazon DataZone creates IAM roles for projects to perform data analytics actions, and uses this policy when creating these roles to define the boundary of their permissions.

`AmazonDataZoneProjectRolePermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneProjectRolePermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 21, 2023, 02:51 UTC
- **Edited time:** March 21, 2023, 02:51 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneProjectRolePermissionsBoundary`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneRedshiftGlueProvisioningPolicy

Description: Amazon DataZone is a data management service that enables you to catalog, discover, govern, share, and analyze your data. With Amazon DataZone, you can share and access your data across accounts and supported regions. Amazon DataZone simplifies your experience across AWS services, including, but not limited to, Amazon Redshift, Amazon Athena, AWS Glue, and AWS Lake Formation.

`AmazonDataZoneRedshiftGlueProvisioningPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneRedshiftGlueProvisioningPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 22, 2023, 20:19 UTC
- **Edited time:** October 23, 2024, 18:29 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneRedshiftGlueProvisioningPolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneRedshiftManageAccessRolePolicy

Description: This policy gives Amazon DataZone permissions to publish Amazon Redshift data to the catalog. It also gives Amazon DataZone permissions to grant access or revoke access to Amazon Redshift or Amazon Redshift Serverless published assets in the catalog.

`AmazonDataZoneRedshiftManageAccessRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneRedshiftManageAccessRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: September 22, 2023, 20:15 UTC
- **Edited time:** March 07, 2025, 00:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonDataZoneRedshiftManageAccessRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary

Description: The AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary policy is the list of permissions that are permitted on an execution role created in a SageMaker environment provisioned by Amazon DataZone.

`AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 23, 2024, 23:01 UTC
- **Edited time:** November 21, 2024, 23:06 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonDataZoneSageMakerManageAccessRolePolicy

Description: The AmazonDataZoneSageMakerManageAccessRolePolicy policy grants Amazon DataZone the permissions required to grant user access to various resources in the SageMaker environment.

`AmazonDataZoneSageMakerManageAccessRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneSageMakerManageAccessRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 23, 2024, 23:34 UTC
- **Edited time:** November 21, 2024, 20:21 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneSageMakerManageAccessRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDetectiveFullAccess

Description: Provides full access to Amazon Detective service and scoped access to the console UI dependencies

`AmazonDetectiveFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDetectiveFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 30, 2020, 17:57 UTC
- **Edited time:** May 17, 2023, 19:39 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDetectiveFullAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "detective:*",
        "organizations:DescribeOrganization",

AmazonDetectiveServiceLinkedRolePolicy

Description: Allows Amazon Detective to make service calls on your behalf

`AmazonDetectiveServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 18, 2021, 19:47 UTC
- **Edited time:** November 18, 2021, 19:47 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonDetectiveServiceLinkedRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "organizations:DescribeAccount",
        "organizations:ListAccounts"
      ],
      "Resource" : "*"
    }
  ]
}

AmazonDevOpsGuruReadOnlyAccess

Description: Provides read only access to Amazon DevOps Guru Console.

`AmazonDevOpsGuruReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDevOpsGuruReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 01, 2020, 16:34 UTC
- **Edited time:** August 25, 2022, 18:11 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDevOpsGuruReadOnlyAccess`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDocDBElasticFullAccess

Description: Provides full access to Amazon DocumentDB Elastic Clusters and other required permissions for its dependencies including EC2, KMS, SecretsManager, CloudWatch and IAM.

`AmazonDocDBElasticFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDocDBElasticFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 05, 2023, 13:51 UTC
- **Edited time:** February 11, 2025, 18:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDocDBElasticFullAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDRSVPCManagement

Description: Provides access to manage VPC settings for Amazon managed customer configurations

`AmazonDRSVPCManagement` is an AWS managed policy.

Using this policy

You can attach `AmazonDRSVPCManagement` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 02, 2015, 00:09 UTC

- **Edited time:** September 02, 2015, 00:09 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDRSVPCManagement`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:AuthorizeSecurityGroupIngress",
        "ec2:CreateNetworkInterface",
        "ec2:CreateSecurityGroup",
        "ec2:DescribeAvailabilityZones",
        "ec2:DescribeInternetGateways",
        "ec2:DescribeSecurityGroups",
        "ec2:DescribeSubnets",
        "ec2:DescribeVpcAttribute",
        "ec2:DescribeVpcs",
        "ec2:DeleteNetworkInterface",
        "ec2:DeleteSecurityGroup",
        "ec2:ModifyNetworkInterfaceAttribute",
        "ec2:RevokeSecurityGroupIngress"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonDynamoDBFullAccess

Description: Provides full access to Amazon DynamoDB via the AWS Management Console.

`AmazonDynamoDBFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDynamoDBFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** January 29, 2021, 17:38 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDynamoDBFullAccess`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonDynamoDBFullAccesswithDataPipeline

Description: This policy is on a deprecation path. See documentation for guidance: https://docs.aws.amazon.com/amazondynamodb/latest/developerguide/DynamoDBPipeline.html. Provides full access to Amazon DynamoDB including Export/Import using AWS Data Pipeline via the AWS Management Console.

`AmazonDynamoDBFullAccesswithDataPipeline` is an AWS managed policy.

Using this policy

You can attach `AmazonDynamoDBFullAccesswithDataPipeline` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** November 12, 2015, 02:17 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDynamoDBFullAccesswithDataPipeline`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEC2ContainerRegistryFullAccess

Description: Provides administrative access to Amazon ECR resources

`AmazonEC2ContainerRegistryFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2ContainerRegistryFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 21, 2015, 17:06 UTC
- **Edited time:** December 05, 2020, 00:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEC2ContainerRegistryFullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ecr:*",
        "cloudtrail:LookupEvents"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "iam:CreateServiceLinkedRole"
      ],
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "iam:AWSServiceName" : [
            "replication.ecr.amazonaws.com"
          ]
        }
      }
    }
  ]
}
```

AmazonEC2ContainerRegistryPowerUser

Description: Provides full access to Amazon EC2 Container Registry repositories, but does not allow repository deletion or policy changes.

`AmazonEC2ContainerRegistryPowerUser` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2ContainerRegistryPowerUser` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 21, 2015, 17:05 UTC
- **Edited time:** December 10, 2019, 20:48 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEC2ContainerRegistryPowerUser`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonEC2ReadOnlyAccess

Description: Provides read only access to Amazon EC2 via the AWS Management Console.

`AmazonEC2ReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2ReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** December 27, 2024, 10:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEC2ReadOnlyAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:Describe*",
        "ec2:GetSecurityGroupsForVpc"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : "elasticloadbalancing:Describe*",
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "cloudwatch:ListMetrics",
        "cloudwatch:GetMetricStatistics",
        "cloudwatch:Describe*"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
```

```
      "Action" : "autoscaling:Describe*",
      "Resource" : "*"

AmazonECS_FullAccess

Description: Provides administrative access to Amazon ECS resources and enables ECS features through access to other AWS service resources, including VPCs, Auto Scaling groups, and CloudFormation stacks.

`AmazonECS_FullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonECS_FullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 07, 2017, 21:36 UTC
- **Edited time:** August 13, 2024, 19:39 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonECS_FullAccess`

Policy version

Policy version: v21 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonECSComputeServiceRolePolicy

Description: Policy to enable Amazon ECS Compute to manage your EC2 instances and related resources as part of ECS managed instances

`AmazonECSComputeServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: March 24, 2025, 17:37 UTC
- **Edited time:** March 28, 2025, 20:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonECSComputeServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

`AmazonECSInfrastructureRolePolicyForVolumes` is an AWS managed policy.

Using this policy

You can attach `AmazonECSInfrastructureRolePolicyForVolumes` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: January 10, 2024, 22:56 UTC
- **Edited time:** May 28, 2025, 20:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonECSInfrastructureRolePolicyForVolumes`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{

AmazonECSInfrastructureRolePolicyForVpcLattice

Description: Provides access to other AWS service resources required to manage VPC Lattice feature in ECS workloads on your behalf.

`AmazonECSInfrastructureRolePolicyForVpcLattice` is an AWS managed policy.

Using this policy

You can attach `AmazonECSInfrastructureRolePolicyForVpcLattice` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 15, 2024, 20:02 UTC
- **Edited time:** November 15, 2024, 20:02 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonECSInfrastructureRolePolicyForVpcLattice`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonECSServiceRolePolicy

Description: Policy to enable Amazon ECS to manage your cluster.

`AmazonECSServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 14, 2017, 01:18 UTC
- **Edited time:** June 24, 2025, 21:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonECSServiceRolePolicy`

Policy version

Policy version: v12 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonEKS_CNI_Policy

Description: This policy provides the Amazon VPC CNI Plugin (amazon-vpc-cni-k8s) the permissions it requires to modify the IP address configuration on your EKS worker nodes. This permission set allows the CNI to list, describe, and modify Elastic Network Interfaces on your behalf. More information on the AWS VPC CNI Plugin is available here: https://github.com/aws/amazon-vpc-cni-k8s

`AmazonEKS_CNI_Policy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKS_CNI_Policy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 27, 2018, 21:07 UTC
- **Edited time:** March 04, 2024, 20:20 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKS_CNI_Policy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSClusterPolicy

Description: This policy provides Kubernetes the permissions it requires to manage resources on your behalf. Kubernetes requires Ec2:CreateTags permissions to place identifying information on EC2 resources including but not limited to Instances, Security Groups, and Elastic Network Interfaces.

`AmazonEKSClusterPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSClusterPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 27, 2018, 21:06 UTC
- **Edited time:** April 17, 2025, 02:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSClusterPolicy`

Policy version

Policy version: v8 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

`AmazonEKSForFargateServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 22, 2019, 04:36 UTC
- **Edited time:** November 22, 2019, 04:36 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEKSForFargateServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:CreateNetworkInterface",
        "ec2:CreateNetworkInterfacePermission",
```

```
        "ec2:DeleteNetworkInterface",
        "ec2:DescribeNetworkInterfaces",
        "ec2:DescribeSecurityGroups",
        "ec2:DescribeSubnets",

AmazonEKSLoadBalancingPolicy

Description: Policy attached to the EKS Cluster Role that grants permissions to manage the cluster's load balancing resources.

`AmazonEKSLoadBalancingPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSLoadBalancingPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 30, 2024, 20:18 UTC
- **Edited time:** January 09, 2025, 22:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSLoadBalancingPolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonEKSLocalOutpostClusterPolicy

Description: This policy provides permissions to EKS local cluster's control-plane instances running in your account to manage resources on your behalf.

`AmazonEKSLocalOutpostClusterPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSLocalOutpostClusterPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 24, 2022, 21:56 UTC
- **Edited time:** October 24, 2024, 17:59 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSLocalOutpostClusterPolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSNetworkingPolicy

Description: Policy attached to the EKS Cluster Role that grants permissions to manage the cluster's networking resources.

`AmazonEKSNetworkingPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSNetworkingPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 28, 2024, 22:34 UTC
- **Edited time:** October 28, 2024, 22:34 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSNetworkingPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "ec2:CreateNetworkInterface",
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "aws:RequestTag/eks:eks-cluster-name" : "${aws:PrincipalTag/eks:eks-cluster-
name}"
        },

AmazonEKSServicePolicy

Description: This policy allows Amazon Elastic Container Service for Kubernetes to create and manage the necessary resources to operate EKS Clusters.

`AmazonEKSServicePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSServicePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 27, 2018, 21:08 UTC
- **Edited time:** October 14, 2024, 21:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSServicePolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSServiceRolePolicy

Description: A Service-Linked Role required for Amazon EKS to call AWS services on your behalf.

`AmazonEKSServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: February 21, 2020, 20:10 UTC
- **Edited time:** August 26, 2025, 22:49 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEKSServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSVPCResourceController

Description: Policy used by VPC Resource Controller to manage ENI and IPs for worker nodes.

`AmazonEKSVPCResourceController` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSVPCResourceController` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 12, 2020, 00:55 UTC
- **Edited time:** August 12, 2020, 00:55 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSVPCResourceController`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
```

```
      "Action" : "ec2:CreateNetworkInterfacePermission",
      "Resource" : "*",
      "Condition" : {
        "ForAnyValue:StringEquals" : {
          "ec2:ResourceTag/eks:eni:owner" : "eks-vpc-resource-controller"
        }
      }
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:CreateNetworkInterface",
        "ec2:DetachNetworkInterface",
        "ec2:ModifyNetworkInterfaceAttribute",
        "ec2:DeleteNetworkInterface",
        "ec2:AttachNetworkInterface",

AmazonElasticFileSystemReadOnlyAccess

Description: Provides read only access to Amazon EFS via the AWS Management Console.

`AmazonElasticFileSystemReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticFileSystemReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 27, 2015, 16:25 UTC
- **Edited time:** November 07, 2024, 19:39 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonElasticFileSystemReadOnlyAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "ElasticFileSystemReadOnlyAccess",
      "Effect" : "Allow",
      "Action" : [
```

AmazonElasticFileSystemServiceRolePolicy

Description: Allows Amazon Elastic File System to manage AWS resources on your behalf

`AmazonElasticFileSystemServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 05, 2019, 16:52 UTC
- **Edited time:** November 07, 2024, 19:19 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonElasticFileSystemServiceRolePolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonElasticFileSystemsUtils

Description: Allows customers to use AWS Systems Manager to automatically manage Amazon EFS utilities (amazon-efs-utils) package on their EC2 instances, and use CloudWatchLog to get EFS file system mount success/failure notifications.

`AmazonElasticFileSystemsUtils` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticFileSystemsUtils` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 29, 2020, 15:16 UTC
- **Edited time:** September 29, 2020, 15:16 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonElasticFileSystemsUtils`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonElasticMapReducePlacementGroupPolicy

Description: Policy to allow EMR to create, describe and delete EC2 placement groups.

`AmazonElasticMapReducePlacementGroupPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticMapReducePlacementGroupPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 29, 2020, 00:37 UTC
- **Edited time:** September 29, 2020, 00:37 UTC

- **ARN**: `arn:aws:iam::aws:policy/AmazonElasticMapReducePlacementGroupPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Resource" : "*",
      "Effect" : "Allow",
      "Action" : [
        "ec2:DeletePlacementGroup",
        "ec2:DescribePlacementGroups"
      ]
    },
    {
      "Resource" : "arn:aws:ec2:*:*:placement-group/EMR_*",
      "Effect" : "Allow",
      "Action" : [
        "ec2:CreatePlacementGroup"
      ]
    }
  ]
}
```

AmazonElasticMapReduceReadOnlyAccess

Description: Provides read only access to Amazon Elastic MapReduce via the AWS Management Console.

`AmazonElasticMapReduceReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticMapReduceReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** July 29, 2020, 23:14 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonElasticMapReduceReadOnlyAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "elasticmapreduce:Describe*",
        "elasticmapreduce:List*",
        "elasticmapreduce:GetBlockPublicAccessConfiguration",
        "elasticmapreduce:ViewEventsFromAllClustersInConsole",
        "s3:GetObject",
        "s3:ListAllMyBuckets",
        "s3:ListBucket",
```

```
        "sdb:Select",
        "cloudwatch:GetMetricStatistics"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonEMRFullAccessPolicy_v2

Description: Provides full access to Amazon EMR

`AmazonEMRFullAccessPolicy_v2` is an AWS managed policy.

Using this policy

You can attach `AmazonEMRFullAccessPolicy_v2` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 12, 2021, 01:50 UTC
- **Edited time:** March 27, 2025, 22:07 UTC

- **ARN**: `arn:aws:iam::aws:policy/AmazonEMRFullAccessPolicy_v2`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRReadOnlyAccessPolicy_v2

Description: Provides read only access to Amazon EMR and the associated CloudWatch Metrics.

`AmazonEMRReadOnlyAccessPolicy_v2` is an AWS managed policy.

Using this policy

You can attach AmazonEMRReadOnlyAccessPolicy_v2 to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 12, 2021, 01:39 UTC
- **Edited time:** August 02, 2023, 19:15 UTC
- **ARN**: arn:aws:iam::aws:policy/AmazonEMRReadOnlyAccessPolicy_v2

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonEMRServerlessServiceRolePolicy

Description: Allows access to other AWS service resources that are required to run Amazon EMRServerless

`AmazonEMRServerlessServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: May 20, 2022, 23:15 UTC
- **Edited time:** January 25, 2024, 18:21 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEMRServerlessServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRServicePolicy_v2

Description: This policy is used for the Amazon EMR Service Role and should NOT be used for any other IAM users or roles in your account. The policy grants permissions to create and manage resources associated with EMR and related services necessary for the operation of your EMR cluster.

`AmazonEMRServicePolicy_v2` is an AWS managed policy.

Using this policy

You can attach `AmazonEMRServicePolicy_v2` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: March 12, 2021, 01:11 UTC
- **Edited time:** March 03, 2025, 20:37 UTC

- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonEMRServicePolicy_v2`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonESCognitoAccess

Description: Provides limited access to the Amazon Cognito configuration service.

`AmazonESCognitoAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonESCognitoAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 28, 2018, 22:29 UTC
- **Edited time:** December 20, 2021, 14:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonESCognitoAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "cognito-idp:DescribeUserPool",
```

```
        "cognito-idp:CreateUserPoolClient",
        "cognito-idp:DeleteUserPoolClient",
        "cognito-idp:UpdateUserPoolClient",
        "cognito-idp:DescribeUserPoolClient",
        "cognito-idp:AdminInitiateAuth",
        "cognito-idp:AdminUserGlobalSignOut",
        "cognito-idp:ListUserPoolClients",
        "cognito-identity:DescribeIdentityPool",
        "cognito-identity:UpdateIdentityPool",
        "cognito-identity:SetIdentityPoolRoles",
        "cognito-identity:GetIdentityPoolRoles"
      ],
      "Resource" : "*"
    },
    {

AmazonESFullAccess

Description: Provides full access to the Amazon ES configuration service.

`AmazonESFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonESFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 01, 2015, 19:14 UTC
- **Edited time:** October 01, 2015, 19:14 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonESFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "es:*"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonEventBridgeApiDestinationsServiceRolePolicy

Description: Allows EventBridge to access Secret Manager resources on your behalf.

`AmazonEventBridgeApiDestinationsServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: February 11, 2021, 20:52 UTC
- **Edited time:** May 29, 2025, 21:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEventBridgeApiDestinationsServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [

AmazonEventBridgeSchedulerFullAccess

Description: The AmazonEventBridgeSchedulerFullAccess managed policy grants permissions to use all EventBridge Scheduler actions for schedules, and schedule groups.

`AmazonEventBridgeSchedulerFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonEventBridgeSchedulerFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 10, 2022, 18:37 UTC
- **Edited time:** May 16, 2025, 19:22 UTC

- **ARN**: `arn:aws:iam::aws:policy/AmazonEventBridgeSchedulerFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "scheduler:*",
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : "iam:PassRole",
      "Resource" : "arn:aws:iam::*:role/*",
      "Condition" : {
        "StringLike" : {
          "iam:PassedToService" : "scheduler.amazonaws.com"
        }
      }
    }
  ]
}
```

AmazonFreeRTOSFullAccess

Description: Full Access Policy for Amazon FreeRTOS

`AmazonFreeRTOSFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonFreeRTOSFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 29, 2017, 15:32 UTC

- **Edited time:** November 29, 2017, 15:32 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonFreeRTOSFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "freertos:*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonFreeRTOSOTAUpdate

Description: Allows user to access Amazon FreeRTOS OTA Update

`AmazonFreeRTOSOTAUpdate` is an AWS managed policy.

Using this policy

You can attach `AmazonFreeRTOSOTAUpdate` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: August 27, 2018, 22:43 UTC
- **Edited time:** December 18, 2020, 17:47 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonFreeRTOSOTAUpdate`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonFSxReadOnlyAccess

Description: Provides read only access to Amazon FSx.

`AmazonFSxReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonFSxReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 28, 2018, 16:33 UTC
- **Edited time:** November 28, 2018, 16:33 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonFSxReadOnlyAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "fsx:Describe*",
        "fsx:ListTagsForResource"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonFSxServiceRolePolicy

Description: Allows Amazon FSx to manage AWS resources on your behalf

`AmazonFSxServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 28, 2018, 10:38 UTC
- **Edited time:** July 22, 2025, 18:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonFSxServiceRolePolicy`

Policy version

Policy version: v8 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonGlacierFullAccess

Description: Provides full access to Amazon Glacier via the AWS Management Console.

`AmazonGlacierFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonGlacierFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** February 06, 2015, 18:40 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonGlacierFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : "glacier:*",
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonGlacierReadOnlyAccess

Description: Provides read only access to Amazon Glacier via the AWS Management Console.

`AmazonGlacierReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonGlacierReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** May 05, 2016, 18:46 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonGlacierReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "glacier:DescribeJob",
        "glacier:DescribeVault",
        "glacier:GetDataRetrievalPolicy",
        "glacier:GetJobOutput",
        "glacier:GetVaultAccessPolicy",
        "glacier:GetVaultLock",
```

```
        "glacier:GetVaultNotifications",
        "glacier:ListJobs",
        "glacier:ListMultipartUploads",
        "glacier:ListParts",
        "glacier:ListTagsForVault",
        "glacier:ListVaults"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonGuardDutyMalwareProtectionServiceRolePolicy

Description: GuardDuty malware protection uses the service-linked role (SLR) named AWSServiceRoleForAmazonGuardDutyMalwareProtection. This service-linked role allows GuardDuty malware protection to perform agent-less scans to detect malware. It allows GuardDuty to create snapshots in your account, and share the snapshots with the GuardDuty service account to scan for malware. It evaluates these shared snapshots and includes the retrieved EC2 instance metadata in the GuardDuty Malware Protection findings. The AWSServiceRoleForAmazonGuardDutyMalwareProtection service-linked role trusts the malware-protection.guardduty.amazonaws.com service to assume the role.

`AmazonGuardDutyMalwareProtectionServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: July 19, 2022, 19:06 UTC
- **Edited time:** January 25, 2024, 22:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonGuardDutyMalwareProtectionServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonInspector2ManagedCisPolicy

Description: This is a managed policy that customer should attach to their roles to communicate with inspector service for CIS scans

`AmazonInspector2ManagedCisPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonInspector2ManagedCisPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 24, 2024, 16:31 UTC
- **Edited time:** January 24, 2024, 16:31 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonInspector2ManagedCisPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "PermissionsForCISScans",
      "Effect" : "Allow",
      "Action" : [
        "inspector2:StartCisSession",
        "inspector2:StopCisSession",
        "inspector2:SendCisSessionTelemetry",
        "inspector2:SendCisSessionHealth"
      ],
```

```
      "Resource" : "*"
    }
  ]
}
```

AmazonInspector2ServiceRolePolicy

Description: Grants Amazon Inspector access to AWS services needed to perform security assessments

`AmazonInspector2ServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 16, 2021, 20:27 UTC
- **Edited time:** April 29, 2025, 17:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonInspector2ServiceRolePolicy`

Policy version

Policy version: v16 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonInspectorFullAccess

Description: Provides full access to Amazon Inspector.

`AmazonInspectorFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonInspectorFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 07, 2015, 17:08 UTC
- **Edited time:** December 21, 2017, 14:53 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonInspectorFullAccess`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonInspectorServiceRolePolicy

Description: Grants Amazon Inspector access to AWS services needed to perform security assessments

`AmazonInspectorServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 21, 2017, 15:48 UTC
- **Edited time:** September 11, 2020, 17:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonInspectorServiceRolePolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonKinesisFullAccess

Description: Provides full access to all streams via the AWS Management Console.

`AmazonKinesisFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonKinesisFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** February 06, 2015, 18:40 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonKinesisFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "kinesis:*",
      "Resource" : "*"
    }
  ]
}
```

AmazonKinesisReadOnlyAccess

Description: Provides read only access to all streams via the AWS Management Console.

`AmazonKinesisReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonKinesisReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** February 06, 2015, 18:40 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonKinesisReadOnlyAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "kinesis:Get*",
        "kinesis:List*",
        "kinesis:Describe*"
      ],
```

```
      "Resource" : "*"
    }
  ]
}
```

AmazonKinesisVideoStreamsFullAccess

Description: Provides full access to Amazon Kinesis Video Streams via the AWS Management Console.

`AmazonKinesisVideoStreamsFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonKinesisVideoStreamsFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 01, 2017, 23:27 UTC
- **Edited time:** December 01, 2017, 23:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonKinesisVideoStreamsFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",

AmazonLaunchWizard_Fullaccess

Description: Full access to AWS Launch wizard and other required services.

`AmazonLaunchWizard_Fullaccess` is an AWS managed policy.

Using this policy

You can attach `AmazonLaunchWizard_Fullaccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 06, 2020, 17:47 UTC
- **Edited time:** February 22, 2023, 17:25 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonLaunchWizard_Fullaccess`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonLaunchWizardFullAccessV2

Description: Full access to AWS Launch wizard and other required services.

`AmazonLaunchWizardFullAccessV2` is an AWS managed policy.

Using this policy

You can attach `AmazonLaunchWizardFullAccessV2` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 01, 2023, 17:14 UTC
- **Edited time:** September 01, 2023, 17:14 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonLaunchWizardFullAccessV2`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonLexChannelsAccess

Description: This policy allows customers to call Lex runtime from channels

`AmazonLexChannelsAccess` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: January 13, 2021, 20:12 UTC
- **Edited time:** January 13, 2021, 20:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonLexChannelsAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
```

```
  "Statement" : [
    {
      "Action" : [
        "lex:ListBots"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonLexFullAccess

Description: Provides full access to Amazon Lex via the AWS Management Console. Also provides access to create Lex Service Linked Roles and grant Lex permissions to invoke a limited set of Lambda functions.

`AmazonLexFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonLexFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 11, 2017, 23:20 UTC
- **Edited time:** April 16, 2024, 20:06 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonLexFullAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonLexReadOnly

Description: Provides read-only access to Amazon Lex.

`AmazonLexReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonLexReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 11, 2017, 23:13 UTC
- **Edited time:** May 13, 2024, 16:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonLexReadOnly`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonLexReplicationPolicy

Description: Allows Amazon Lex to replicate Lex resources across regions on your behalf.

`AmazonLexReplicationPolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: January 31, 2024, 23:29 UTC
- **Edited time:** June 24, 2025, 21:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonLexReplicationPolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonLookoutVisionConsoleReadOnlyAccess

Description: Provides read only access to Amazon Lookout for Vision and scoped access to required service and console dependencies.

`AmazonLookoutVisionConsoleReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonLookoutVisionConsoleReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 11, 2021, 19:32 UTC
- **Edited time:** December 09, 2021, 02:46 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonLookoutVisionConsoleReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "LookoutVisionReadOnlyAccess",
```

```

AmazonManagedBlockchainConsoleFullAccess

Description: Provides full access to Amazon Managed Blockchain via the AWS Management Console

`AmazonManagedBlockchainConsoleFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonManagedBlockchainConsoleFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 29, 2019, 21:23 UTC
- **Edited time:** April 29, 2019, 21:23 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonManagedBlockchainConsoleFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "managedblockchain:*",
        "ec2:DescribeAvailabilityZones",
        "ec2:DescribeSecurityGroups",
        "ec2:DescribeSubnets",
        "ec2:DescribeVpcs",
        "ec2:CreateVpcEndpoint",
        "kms:ListAliases",
        "kms:DescribeKey"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonMQApiFullAccess

Description: Provides full access to AmazonMQ via our API/SDK.

`AmazonMQApiFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonMQApiFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 18, 2018, 20:31 UTC
- **Edited time:** November 04, 2020, 16:45 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonMQApiFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
```

```
      "Effect" : "Allow",
      "Action" : [
        "mq:*",
        "ec2:CreateNetworkInterface",
        "ec2:CreateNetworkInterfacePermission",
        "ec2:DeleteNetworkInterface",
        "ec2:DeleteNetworkInterfacePermission",
        "ec2:DetachNetworkInterface",
        "ec2:DescribeInternetGateways",
        "ec2:DescribeNetworkInterfaces",

AmazonNimbleStudio-LaunchProfileWorker

Description: This policy grants access to resources needed by Nimble Studio Launch Profile workers. Attach this policy to EC2 instances created by Nimble Studio Builder.

`AmazonNimbleStudio-LaunchProfileWorker` is an AWS managed policy.

Using this policy

You can attach `AmazonNimbleStudio-LaunchProfileWorker` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 28, 2021, 04:47 UTC
- **Edited time:** April 28, 2021, 04:47 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonNimbleStudio-LaunchProfileWorker`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:DescribeNetworkInterfaces",
        "ec2:DescribeSecurityGroups",
        "fsx:DescribeFileSystems",
        "ds:DescribeDirectories"
      ],
      "Resource" : [
        "*"
      ],
      "Condition" : {
        "StringEquals" : {

AmazonODBServiceRolePolicy

Description: Allows Oracle Database@AWS to manage AWS resources on your behalf.

`AmazonODBServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 13, 2024, 18:21 UTC

- **Edited time:** July 03, 2025, 17:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonODBServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonOpenSearchIngestionFullAccess

Description: Allows Amazon OpenSearch Ingestion to access other AWS services on your behalf.

`AmazonOpenSearchIngestionFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonOpenSearchIngestionFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 26, 2023, 18:11 UTC
- **Edited time:** April 26, 2023, 18:11 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonOpenSearchIngestionFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "osis:CreatePipeline",
        "osis:UpdatePipeline",
        "osis:DeletePipeline",

AmazonPersonalizeFullAccess

Description: Provides full access to Amazon Personalize via the AWS Management Console and SDK. Also provides select access to related services (e.g., S3, CloudWatch).

`AmazonPersonalizeFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonPersonalizeFullAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: December 04, 2018, 22:24 UTC
- **Edited time:** May 30, 2019, 23:46 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonPersonalizeFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",

AmazonPollyFullAccess

Description: Grants full access to Amazon Polly service and resources.

`AmazonPollyFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonPollyFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 30, 2016, 18:59 UTC
- **Edited time:** November 30, 2016, 18:59 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonPollyFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "polly:*"
      ],
      "Resource" : [
        "*"
      ]
    }
  ]
}
```

AmazonPollyReadOnlyAccess

Description: Grants read-only access to Amazon Polly resources.

`AmazonPollyReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonPollyReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 30, 2016, 18:59 UTC
- **Edited time:** July 17, 2018, 16:41 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonPollyReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "polly:DescribeVoices",
        "polly:GetLexicon",
        "polly:GetSpeechSynthesisTask",
        "polly:ListLexicons",
        "polly:ListSpeechSynthesisTasks",
```

```
        "polly:SynthesizeSpeech"
      ],
      "Resource" : [
        "*"
      ]
    }
  ]
}
```

AmazonQLDBFullAccess

Description: Provides full access to Amazon QLDB via the service API.

`AmazonQLDBFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonQLDBFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 05, 2019, 18:23 UTC
- **Edited time:** November 04, 2022, 17:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonQLDBFullAccess`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "qldb:CreateLedger",
        "qldb:UpdateLedger",

AmazonQLDBReadOnly

Description: Provides read only access to Amazon QLDB.

`AmazonQLDBReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonQLDBReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 05, 2019, 18:19 UTC
- **Edited time:** July 02, 2021, 02:17 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonQLDBReadOnly`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
```

```
      "Effect" : "Allow",
      "Action" : [
        "qldb:ListLedgers",
        "qldb:DescribeLedger",
        "qldb:ListJournalS3Exports",
        "qldb:ListJournalS3ExportsForLedger",
        "qldb:DescribeJournalS3Export",
        "qldb:DescribeJournalKinesisStream",
        "qldb:ListJournalKinesisStreamsForLedger",
        "qldb:GetBlock",
        "qldb:GetDigest",
        "qldb:GetRevision",
        "qldb:ListTagsForResource"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonRDSBetaServiceRolePolicy

Description: Allows Amazon RDS to manage AWS resources on your behalf.

`AmazonRDSBetaServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy

- **Creation time**: May 02, 2018, 19:41 UTC
- **Edited time:** August 07, 2024, 00:54 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSBetaServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonRDSCustomPreviewServiceRolePolicy

Description: Amazon RDS Custom Preview Service Role Policy

`AmazonRDSCustomPreviewServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 08, 2021, 21:44 UTC
- **Edited time:** August 07, 2025, 20:19 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSCustomPreviewServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRDSCustomServiceRolePolicy

Description: Allows Amazon RDS Custom to manage AWS resources on your behalf.

`AmazonRDSCustomServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 08, 2021, 21:39 UTC
- **Edited time:** August 07, 2025, 20:49 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSCustomServiceRolePolicy`

Policy version

Policy version: v13 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRDSDataFullAccess

Description: Allows full access to use the RDS data APIs, secret store APIs for RDS database credentials, and DB console query management APIs to execute SQL statements on Aurora Serverless clusters in the AWS account.

`AmazonRDSDataFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRDSDataFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 20, 2018, 21:29 UTC
- **Edited time:** November 20, 2019, 21:58 UTC

- **ARN**: `arn:aws:iam::aws:policy/AmazonRDSDataFullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRDSDirectoryServiceAccess

Description: Allow RDS to access Directory Service Managed AD on behalf of the customer for domain-joined SQL Server DB instances.

`AmazonRDSDirectoryServiceAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRDSDirectoryServiceAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: February 26, 2016, 02:02 UTC
- **Edited time:** May 15, 2019, 16:51 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonRDSDirectoryServiceAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "ds:DescribeDirectories",
        "ds:AuthorizeApplication",
        "ds:UnauthorizeApplication",
        "ds:GetAuthorizedApplicationDetails"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonRDSEnhancedMonitoringRole

Description: Provides access to Cloudwatch for RDS Enhanced Monitoring

`AmazonRDSEnhancedMonitoringRole` is an AWS managed policy.

Using this policy

You can attach `AmazonRDSEnhancedMonitoringRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 11, 2015, 19:58 UTC
- **Edited time:** November 11, 2015, 19:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonRDSEnhancedMonitoringRole`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "EnableCreationAndManagementOfRDSCloudwatchLogGroups",
      "Effect" : "Allow",
      "Action" : [
        "logs:CreateLogGroup",
        "logs:PutRetentionPolicy"
      ],
      "Resource" : [
        "arn:aws:logs:*:*:log-group:RDS*"
      ]
    },
    {
      "Sid" : "EnableCreationAndManagementOfRDSCloudwatchLogStreams",
      "Effect" : "Allow",
      "Action" : [
        "logs:CreateLogStream",
```

```
        "logs:PutLogEvents",
        "logs:DescribeLogStreams",
        "logs:GetLogEvents"
      ],
      "Resource" : [
        "arn:aws:logs:*:*:log-group:RDS*:log-stream:*"
      ]
    }
  ]
}
```

AmazonRDSFullAccess

Description: Provides full access to Amazon RDS via the AWS Management Console.

`AmazonRDSFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRDSFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** August 17, 2023, 23:00 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRDSFullAccess`

Policy version

Policy version: v14 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonRDSPreviewServiceRolePolicy

Description: Amazon RDS Preview Service Role Policy

`AmazonRDSPreviewServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: May 31, 2018, 18:02 UTC
- **Edited time:** August 07, 2024, 01:02 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSPreviewServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",

AmazonRDSServiceRolePolicy

Description: Allows Amazon RDS to manage AWS resources on your behalf.

`AmazonRDSServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: January 08, 2018, 18:17 UTC
- **Edited time:** July 01, 2024, 22:42 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSServiceRolePolicy`

Policy version

Policy version: v14 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftAllCommandsFullAccess

Description: This policy includes permissions to run SQL commands to copy, load, unload, query, and analyze data on Amazon Redshift. The policy also grants permissions to run select statements for related services, such as Amazon S3, Amazon CloudWatch logs, Amazon SageMaker, or AWS Glue.

`AmazonRedshiftAllCommandsFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftAllCommandsFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 04, 2021, 00:48 UTC
- **Edited time:** November 25, 2021, 02:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftAllCommandsFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftQueryEditor

Description: Provides full access to the Amazon Redshift Query Editor and to saved queries via the AWS Management Console.

`AmazonRedshiftQueryEditor` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftQueryEditor` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 04, 2018, 22:50 UTC
- **Edited time:** February 16, 2021, 19:33 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftQueryEditor`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftQueryEditorV2FullAccess

Description: Grants full access to the Amazon Redshift Query Editor V2 operations and resources. This policy also grants access to other required services. This includes permissions to list the Amazon Redshift clusters, read keys and aliases in AWS KMS and manage the Query Editor V2 secrets in AWS Secrets Manager.

`AmazonRedshiftQueryEditorV2FullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftQueryEditorV2FullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 24, 2021, 14:06 UTC
- **Edited time:** February 21, 2024, 17:20 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftQueryEditorV2FullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonRedshiftQueryEditorV2NoSharing

Description: Grants the ability to work with Amazon Redshift Query Editor V2 without sharing resources. The granted principal can only read, update and delete its own resources but cannot share them. This policy also grants access to other required services. This includes permissions to list the Amazon Redshift clusters and manage the Query Editor V2 secrets of the principal in AWS Secrets Manager.

`AmazonRedshiftQueryEditorV2NoSharing` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftQueryEditorV2NoSharing` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 24, 2021, 14:18 UTC

- **Edited time:** February 21, 2024, 17:25 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftQueryEditorV2NoSharing`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftQueryEditorV2ReadWriteSharing

Description: Grants the ability to work with Amazon Redshift Query Editor V2 with sharing of resources. The granted principal can read, write and share its own resources. The granted principal can read and update the resources shared with its team. This policy also grants access to other

required services. This includes permissions to list the Amazon Redshift clusters and manage the Query Editor V2 secrets of the principal in AWS Secrets Manager.

`AmazonRedshiftQueryEditorV2ReadWriteSharing` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftQueryEditorV2ReadWriteSharing` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 24, 2021, 14:25 UTC
- **Edited time:** February 21, 2024, 17:30 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftQueryEditorV2ReadWriteSharing`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftReadOnlyAccess

Description: Provides read only access to Amazon Redshift via the AWS Management Console.

`AmazonRedshiftReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** February 08, 2024, 00:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AmazonRedshiftReadOnlyAccess",

AmazonRedshiftServiceLinkedRolePolicy

Description: Allows Amazon Redshift to call AWS services on your behalf

`AmazonRedshiftServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: September 18, 2017, 19:19 UTC
- **Edited time:** February 19, 2025, 17:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRedshiftServiceLinkedRolePolicy`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRekognitionCustomLabelsFullAccess

Description: This policy specifies rekognition and s3 permissions required by Amazon Rekognition Custom Labels feature.

`AmazonRekognitionCustomLabelsFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRekognitionCustomLabelsFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 08, 2020, 19:18 UTC
- **Edited time:** August 16, 2022, 20:20 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRekognitionCustomLabelsFullAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 02, 2020, 18:55 UTC
- **Edited time:** October 02, 2020, 18:55 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonS3OutpostsReadOnlyAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3-outposts:Get*",
        "s3-outposts:List*"
      ],
      "Resource" : "*"
    },
    {
```

```
      "Effect" : "Allow",
      "Action" : [
        "datasync:ListTasks",
        "datasync:ListLocations",
        "datasync:DescribeTask",
        "datasync:DescribeLocation*"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:DescribeVpcs",

AmazonS3ReadOnlyAccess

Description: Provides read only access to all buckets via the AWS Management Console.

`AmazonS3ReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonS3ReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** August 10, 2023, 21:31 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonS3ReadOnlyAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:Get*",
        "s3:List*",
        "s3:Describe*",
        "s3-object-lambda:Get*",
        "s3-object-lambda:List*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonS3TablesFullAccess

Description: Provides full access to all S3 table buckets.

`AmazonS3TablesFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonS3TablesFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 03, 2024, 15:21 UTC
- **Edited time:** December 03, 2024, 15:21 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonS3TablesFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
```

```
      "Effect" : "Allow",
      "Action" : [
        "s3tables:*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonS3TablesLakeFormationServiceRole

Description: This managed policy grants AWS Lake Formation permissions to act on all table buckets, namespaces, and tables within the account.

`AmazonS3TablesLakeFormationServiceRole` is an AWS managed policy.

Using this policy

You can attach `AmazonS3TablesLakeFormationServiceRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: June 19, 2025, 19:07 UTC
- **Edited time:** July 09, 2025, 22:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonS3TablesLakeFormationServiceRole`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerAdmin-ServiceCatalogProductsServiceRolePolicy

Description: Service role policy used by the AWS service Catalog service to provision products from Amazon SageMaker portfolio of products. Grants permissions to a set of related services including CodePipeline, CodeBuild, CodeCommit, Glue, CloudFormation, etc,.

`AmazonSageMakerAdmin-ServiceCatalogProductsServiceRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerAdmin-ServiceCatalogProductsServiceRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 27, 2020, 18:48 UTC
- **Edited time:** July 01, 2024, 07:33 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerAdmin-ServiceCatalogProductsServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasAIServicesAccess

Description: Provides permissions for Amazon SageMaker Canvas to use AI services to support ready to use AI solutions. This policy will add more mutating permissions for services as Amazon SageMaker Canvas adds support.

`AmazonSageMakerCanvasAIServicesAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasAIServicesAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 23, 2023, 22:36 UTC
- **Edited time:** November 29, 2023, 14:47 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasAIServicesAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasBedrockAccess

Description: This policy grants permissions to use Amazon Bedrock in SageMaker Canvas by providing access to downstream services such as S3.

`AmazonSageMakerCanvasBedrockAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasBedrockAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 02, 2024, 18:37 UTC
- **Edited time:** February 02, 2024, 18:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasBedrockAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "S3CanvasAccess",
      "Effect" : "Allow",
      "Action" : [
        "s3:GetObject",
        "s3:PutObject"
      ],
      "Resource" : [
        "arn:aws:s3:::sagemaker-*/Canvas",
        "arn:aws:s3:::sagemaker-*/Canvas/*"
      ]
    },
    {
      "Sid" : "S3BucketAccess",
```

```
      "Effect" : "Allow",

AmazonSageMakerCanvasDataPrepFullAccess

Description: Provides full access to Amazon SageMaker resources and operations for data preparation in Canvas. The policy also provides select access to related services (e.g., S3, IAM, KMS, RDS, CloudWatch Logs, Redshift, Athena, Glue, EventBridge, Secrets Manager). This policy should be attached to the Amazon SageMaker Domain/User Profile execution role.

`AmazonSageMakerCanvasDataPrepFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasDataPrepFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 27, 2023, 22:56 UTC
- **Edited time:** August 16, 2024, 18:11 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasDataPrepFullAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasDirectDeployAccess

Description: Allows Amazon SageMaker Canvas to create, manage and view endpoint details for endpoints created through Canvas. Allows Amazon SageMaker Canvas to retrieve endpoint invocation metrics from CloudWatch.

`AmazonSageMakerCanvasDirectDeployAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasDirectDeployAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: October 06, 2023, 18:11 UTC
- **Edited time:** October 06, 2023, 18:11 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerCanvasDirectDeployAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "SageMakerEndpointPerms",
      "Effect" : "Allow",

AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy

Description: This policy grants permissions to Amazon EMR Serverless for services such as S3, used by Amazon SageMaker Canvas for large data processing.

`AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 27, 2024, 00:35 UTC
- **Edited time:** July 27, 2024, 00:35 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasForecastAccess

Description: This policy grants permissions commonly needed to use SageMaker Canvas with Amazon Forecast.

`AmazonSageMakerCanvasForecastAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasForecastAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: August 24, 2022, 20:04 UTC
- **Edited time:** August 24, 2022, 20:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerCanvasForecastAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerCanvasFullAccess

Description: Provides full access to Amazon SageMaker Canvas resources and operations. The policy also provides select access to related services (e.g., S3, IAM, VPC, ECR, CloudWatch Logs, Redshift, Secrets Manager, and Forecast). This policy should be attached to the Amazon SageMaker Domain/User Profile execution role.

`AmazonSageMakerCanvasFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 09, 2022, 00:44 UTC
- **Edited time:** August 16, 2024, 04:35 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasFullAccess`

Policy version

Policy version: v11 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasSMDataScienceAssistantAccess

Description: Provides permissions for Amazon SageMaker Canvas to use the SageMaker Data Science Assistant service. The Data Science Assistant currently uses both Amazon SageMaker and Amazon Q Developer to process user prompts.

`AmazonSageMakerCanvasSMDataScienceAssistantAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasSMDataScienceAssistantAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 04, 2024, 14:06 UTC
- **Edited time:** January 13, 2025, 22:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasSMDataScienceAssistantAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "SageMakerDataScienceAssistantAccess",

AmazonSageMakerClusterInstanceRolePolicy

Description: This policy grants permissions commonly needed to use Amazon SageMaker Cluster.

`AmazonSageMakerClusterInstanceRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerClusterInstanceRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 29, 2023, 15:11 UTC
- **Edited time:** November 29, 2023, 15:11 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerClusterInstanceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCoreServiceRolePolicy

Description: Managed policy for Service Linked Role for Amazon SageMaker Core Services

`AmazonSageMakerCoreServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: December 21, 2020, 21:40 UTC
- **Edited time:** December 21, 2020, 21:40 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerCoreServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerEdgeDeviceFleetPolicy

Description: Provides permissions necessary for SageMaker Edge to create and manage a device fleet for the customer using the default cloud connection.

`AmazonSageMakerEdgeDeviceFleetPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerEdgeDeviceFleetPolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: December 08, 2020, 16:17 UTC

- **Edited time:** December 08, 2020, 16:17 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerEdgeDeviceFleetPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerFeatureStoreAccess

Description: Provides permissions required to enable the offline store for an Amazon SageMaker FeatureStore feature group.

`AmazonSageMakerFeatureStoreAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerFeatureStoreAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 01, 2020, 16:24 UTC
- **Edited time:** December 05, 2022, 14:19 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerFeatureStoreAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",

AmazonSageMakerFullAccess

Description: Provides full access to Amazon SageMaker via the AWS Management Console and SDK. Also provides select access to related services (e.g., S3, ECR, CloudWatch Logs).

`AmazonSageMakerFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 29, 2017, 13:07 UTC
- **Edited time:** December 04, 2024, 13:21 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerFullAccess`

Policy version

Policy version: v27 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerGeospatialExecutionRole

Description: This policy provide access to services that are commonly needed to use SageMaker geospatial.

`AmazonSageMakerGeospatialExecutionRole` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerGeospatialExecutionRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 30, 2022, 10:08 UTC
- **Edited time:** May 10, 2023, 20:28 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerGeospatialExecutionRole`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:AbortMultipartUpload",
        "s3:PutObject",
        "s3:GetObject",
        "s3:ListBucketMultipartUploads"
      ],
      "Resource" : [
        "arn:aws:s3:::*SageMaker*",
        "arn:aws:s3:::*Sagemaker*",
        "arn:aws:s3:::*sagemaker*"
      ]
    },
    {
      "Effect" : "Allow",
      "Action" : "sagemaker-geospatial:GetEarthObservationJob",
      "Resource" : "arn:aws:sagemaker-geospatial:*:*:earth-observation-job/*"
    },
    {
      "Effect" : "Allow",
      "Action" : "sagemaker-geospatial:GetRasterDataCollection",
      "Resource" : "arn:aws:sagemaker-geospatial:*:*:raster-data-collection/*"
    }
  ]
}
```

AmazonSageMakerGeospatialFullAccess

Description: This policy grants permissions that allow full access to Amazon SageMaker Geospatial through the AWS Management Console and SDK.

`AmazonSageMakerGeospatialFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerGeospatialFullAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 30, 2022, 10:06 UTC
- **Edited time:** November 30, 2022, 10:06 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerGeospatialFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerGroundTruthExecution

Description: Provides access to AWS services that are required to run SageMaker GroundTruth Labeling job

`AmazonSageMakerGroundTruthExecution` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerGroundTruthExecution` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 09, 2020, 19:30 UTC

- **Edited time:** April 29, 2022, 20:49 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerGroundTruthExecution`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonSageMakerHyperPodObservabilityAdminAccess

Description: This policy provides administrative privileges required for setting up SageMaker HyperPod observability. It enables access to Amazon Managed Prometheus, Amazon Managed Grafana and EKS Addons. The policy also includes broad access to Grafana HTTP APIs through ServiceAccountTokens across all Amazon Managed Grafana workspaces in your account.

`AmazonSageMakerHyperPodObservabilityAdminAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerHyperPodObservabilityAdminAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 10, 2025, 14:37 UTC
- **Edited time:** August 21, 2025, 21:19 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerHyperPodObservabilityAdminAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerHyperPodServiceRolePolicy

Description: This policy grants permissions to Amazon SageMaker HyperPod to related AWS services such as Amazon EKS, Amazon CloudWatch etc.

`AmazonSageMakerHyperPodServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: September 06, 2024, 17:04 UTC
- **Edited time:** September 06, 2024, 17:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerHyperPodServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "EKSClusterDescribePermissions",

AmazonSageMakerHyperPodTrainingOperatorAccess

Description: This policy provides administrative permissions required to set up the SageMaker HyperPod training operator. It enables access to Amazon SageMaker HyperPod and EKS add-ons. The policy includes permissions to describe the SageMaker HyperPod resources in your account.

`AmazonSageMakerHyperPodTrainingOperatorAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerHyperPodTrainingOperatorAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 19, 2025, 17:04 UTC
- **Edited time:** August 19, 2025, 17:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerHyperPodTrainingOperatorAccess`

AmazonSageMakerNotebooksServiceRolePolicy

Description: Managed policy for Service Linked Role for Amazon SageMaker Notebooks

`AmazonSageMakerNotebooksServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 18, 2019, 20:27 UTC
- **Edited time:** November 14, 2024, 20:33 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerNotebooksServiceRolePolicy`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerPartnerServiceCatalogProductsLambdaServiceRo

Description: Service role policy used by the AWS Lambda within the AWS ServiceCatalog provisioned products from Amazon SageMaker portfolio of products. Grants permissions to a set of related services including Secrets Manager and others.

`AmazonSageMakerPartnerServiceCatalogProductsLambdaServiceRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerPartnerServiceCatalogProductsLambdaServiceRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: August 01, 2023, 15:05 UTC
- **Edited time:** August 01, 2023, 15:05 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerPartnerServiceCatalogProductsLambdaServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "secretsmanager:GetSecretValue",
      "Resource" : "arn:aws:secretsmanager:*:*:secret:*",
      "Condition" : {
        "Null" : {
          "aws:ResourceTag/sagemaker:partner" : false
        },
        "StringEquals" : {
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
      }
    }
  ]
}
```

AmazonSageMakerPipelinesIntegrations

Description: This Amazon Managed Policy grants permissions commonly needed for use with Callback steps and Lambda steps in SageMaker Model Building Pipelines. It is added to the AmazonSageMaker-ExecutionRole that can be created when setting up SageMaker Studio. It can also be attached to any other role that will be used for authoring or executing pipelines.

`AmazonSageMakerPipelinesIntegrations` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerPipelinesIntegrations` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 30, 2021, 16:35 UTC
- **Edited time:** February 17, 2023, 21:28 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerPipelinesIntegrations`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerServiceCatalogProductsCodeBuildServiceRolePol

Description: Service role policy used by the AWS CodeBuild within the AWS ServiceCatalog provisioned products from Amazon SageMaker portfolio of products. Grants permissions to a subset of related services including CodePipeline, CodeBuild and others.

`AmazonSageMakerServiceCatalogProductsCodeBuildServiceRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerServiceCatalogProductsCodeBuildServiceRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 25, 2022, 04:27 UTC
- **Edited time:** June 11, 2024, 18:45 UTC

- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerServiceCatalogProductsCodeBuildServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerServiceCatalogProductsCodePipelineServiceRole

Description: Service role policy used by the AWS CodePipeline within the AWS ServiceCatalog provisioned products from Amazon SageMaker portfolio of products. Grants permissions to a subset of related services including CodePipeline, CodeBuild and others.

`AmazonSageMakerServiceCatalogProductsCodePipelineServiceRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerServiceCatalogProductsCodePipelineServiceRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: February 22, 2022, 09:53 UTC

- **Edited time:** June 11, 2024, 18:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerServiceCatalogProductsCodePipelineServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerTrainingPlanCreateAccess

Description: This Amazon Managed Policy provides the necessary permissions to create and manage SageMaker Training Plans. It allows users to create Training Plans and Reserved Capacities, describe existing Training Plans, and perform search and listing operations.

`AmazonSageMakerTrainingPlanCreateAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerTrainingPlanCreateAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 04, 2024, 13:21 UTC
- **Edited time:** August 08, 2025, 21:19 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerTrainingPlanCreateAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSecurityLakeAdministrator

Description: Provides full access to Amazon Security Lake and related services needed to administer Security Lake.

`AmazonSecurityLakeAdministrator` is an AWS managed policy.

Using this policy

You can attach `AmazonSecurityLakeAdministrator` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 30, 2023, 22:04 UTC
- **Edited time:** February 23, 2024, 16:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSecurityLakeAdministrator`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSecurityLakeMetastoreManager

Description: Policy for Amazon SecurityLake meta store manager lambda which allows the access to cloudwatch, S3, Glue and SQS.

`AmazonSecurityLakeMetastoreManager` is an AWS managed policy.

Using this policy

You can attach `AmazonSecurityLakeMetastoreManager` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: January 23, 2024, 15:26 UTC
- **Edited time:** April 01, 2024, 20:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSecurityLakeMetastoreManager`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSecurityLakePermissionsBoundary

Description: Amazon Security Lake creates IAM roles for third-party custom sources to write data to a data lake and for third-party subscribers to consume data from a data lake, and uses this policy when creating these roles to define the boundary of their permissions.

`AmazonSecurityLakePermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonSecurityLakePermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: November 29, 2022, 14:11 UTC
- **Edited time:** May 14, 2024, 20:39 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSecurityLakePermissionsBoundary`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonSESFullAccess

Description: Provides full access to Amazon SES via the AWS Management Console.

`AmazonSESFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSESFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: February 06, 2015, 18:41 UTC
- **Edited time:** February 06, 2015, 18:41 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSESFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ses:*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonSESReadOnlyAccess

Description: Provides read only access to Amazon SES via the AWS Management Console.

`AmazonSESReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSESReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:41 UTC
- **Edited time:** May 14, 2024, 12:03 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSESReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "SESReadOnlyAccess",
      "Effect" : "Allow",
      "Action" : [
        "ses:Get*",
        "ses:List*",
        "ses:BatchGetMetricData"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonSESServiceRolePolicy

Description: Allows SES to publish Amazon CloudWatch basic monitoring metrics on behalf of your SES resources

`AmazonSESServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: May 21, 2024, 16:02 UTC
- **Edited time:** May 21, 2024, 16:02 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonSESServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",

AmazonSSMAutomationRole

Description: Provides permissions for EC2 Automation service to execute activities defined within Automation documents

`AmazonSSMAutomationRole` is an AWS managed policy.

Using this policy

You can attach `AmazonSSMAutomationRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: December 05, 2016, 22:09 UTC
- **Edited time:** July 24, 2017, 23:29 UTC

- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSSMAutomationRole`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "lambda:InvokeFunction"
      ],
      "Resource" : [
        "arn:aws:lambda:*:*:function:Automation*"
      ]
    },
    {
      "Effect" : "Allow",
      "Action" : [

AmazonSSMDirectoryServiceAccess

Description: This policy allows SSM Agent to access Directory Service on behalf of the customer for domain-join the managed instance.

`AmazonSSMDirectoryServiceAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSSMDirectoryServiceAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 15, 2019, 17:44 UTC
- **Edited time:** March 15, 2019, 17:44 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSSMDirectoryServiceAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ds:CreateComputer",
        "ds:DescribeDirectories"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonSSMFullAccess

Description: Provides full access to Amazon SSM.

`AmazonSSMFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSSMFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 29, 2015, 17:39 UTC
- **Edited time:** November 20, 2019, 20:08 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSSMFullAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "cloudwatch:PutMetricData",

AmazonSumerianFullAccess

Description: Provides full access to Amazon Sumerian.

`AmazonSumerianFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSumerianFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 24, 2018, 20:14 UTC
- **Edited time:** April 24, 2018, 20:14 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSumerianFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "sumerian:*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonTextractFullAccess

Description: Access to all Amazon Textract APIs

`AmazonTextractFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonTextractFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 28, 2018, 19:07 UTC
- **Edited time:** November 28, 2018, 19:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonTextractFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "textract:*"
      ],
```

```
      "Resource" : "*"
    }
  ]
}
```

AmazonTextractServiceRole

Description: Allows Textract to call AWS services on your behalf.

`AmazonTextractServiceRole` is an AWS managed policy.

Using this policy

You can attach `AmazonTextractServiceRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 28, 2018, 19:12 UTC
- **Edited time:** November 28, 2018, 19:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonTextractServiceRole`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "sns:Publish"
      ],
      "Resource" : "arn:aws:sns:*:*:AmazonTextract*"
    }
  ]
}

AmazonTimestreamConsoleFullAccess

Description: Provides full access to manage Amazon Timestream using the AWS Management Console. Note that this policy also grants permissions for certain KMS operations, and operations to manage your saved queries. If using Customer managed CMK, please refer to documentation for additional permissions needed.

`AmazonTimestreamConsoleFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonTimestreamConsoleFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 30, 2020, 21:47 UTC

- **Edited time:** September 04, 2025, 15:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonTimestreamConsoleFullAccess`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonTimestreamInfluxDBServiceRolePolicy

Description: Provides full administrative access to create, update, delete and list Amazon Timestream InfluxDB instances and create and list parameter groups. Please refer to documentation for additional permissions needed.

`AmazonTimestreamInfluxDBServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: March 14, 2024, 18:53 UTC
- **Edited time:** March 14, 2024, 18:53 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonTimestreamInfluxDBServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [

AmazonTimestreamReadOnlyAccess

Description: Provides read only access to Amazon Timestream. Policy also provides permission to cancel any running query. If using Customer managed CMK, please refer to documentation for additional permissions needed.

`AmazonTimestreamReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonTimestreamReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 30, 2020, 21:47 UTC
- **Edited time:** June 05, 2024, 19:11 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonTimestreamReadOnlyAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AmazonTimestreamReadOnlyAccess",
      "Effect" : "Allow",
      "Action" : [
        "timestream:CancelQuery",
```

```
        "timestream:DescribeDatabase",
        "timestream:DescribeEndpoints",
        "timestream:DescribeTable",
        "timestream:ListDatabases",
        "timestream:ListMeasures",
        "timestream:ListTables",
        "timestream:ListTagsForResource",
        "timestream:Select",
        "timestream:SelectValues",

AmazonVPCNetworkAccessAnalyzerFullAccessPolicy

Description: Provides permissions to describe AWS resources, run Network Access Analyzer, and create or delete tags on Network Insights Access Scope and Network Insights Access Scope Analysis.

`AmazonVPCNetworkAccessAnalyzerFullAccessPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonVPCNetworkAccessAnalyzerFullAccessPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: June 15, 2023, 22:56 UTC
- **Edited time:** May 15, 2024, 21:40 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonVPCNetworkAccessAnalyzerFullAccessPolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonVPCReachabilityAnalyzerPathComponentReadPolicy

Description: This policy is attached to the role IAMRoleForReachabilityAnalyzerCrossAccountResourceAccess. This role is deployed to the member accounts in an organization when the management account enables trusted access for Reachability Analyzer. It provides permissions to view resources from across your organization using the Reachability Analyzer console.

`AmazonVPCReachabilityAnalyzerPathComponentReadPolicy` is an AWS managed policy.

Using this policy

You can attach AmazonVPCReachabilityAnalyzerPathComponentReadPolicy to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 01, 2023, 20:38 UTC
- **Edited time:** May 01, 2023, 20:38 UTC
- **ARN**: arn:aws:iam::aws:policy/AmazonVPCReachabilityAnalyzerPathComponentReadPolicy

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "NetworkFirewallPermissions",
      "Effect" : "Allow",

AmazonWorkMailEventsServiceRolePolicy

Description: Enables access to AWS services and Resources used or managed by Amazon WorkMail Events

`AmazonWorkMailEventsServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: April 16, 2019, 16:52 UTC
- **Edited time:** April 16, 2019, 16:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonWorkMailEventsServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "logs:CreateLogGroup",
        "logs:CreateLogStream",
```

```
        "logs:PutLogEvents"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonWorkMailFullAccess

Description: Provides full access to WorkMail, Directory Service, SES, EC2 and read access to KMS metadata.

`AmazonWorkMailFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonWorkMailFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** December 21, 2020, 14:13 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonWorkMailFullAccess`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

`AmazonWorkSpacesThinClientFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonWorkSpacesThinClientFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 09, 2024, 07:25 UTC
- **Edited time:** August 26, 2025, 17:34 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonWorkSpacesThinClientFullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AllowThinClientFullAccess",
      "Effect" : "Allow",

AmazonWorkSpacesThinClientMonitoringServiceRolePolicy

Description: Enables access to AWS services and Resources used or managed by Amazon WorkSpaces Thin Client Monitoring

`AmazonWorkSpacesThinClientMonitoringServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy

- **Creation time**: June 13, 2025, 19:37 UTC
- **Edited time:** June 13, 2025, 19:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonWorkSpacesThinClientMonitoringServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AllowCloudWatchPutMetricData",
      "Effect" : "Allow",
      "Action" : [
        "cloudwatch:PutMetricData"
      ],
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "cloudwatch:namespace" : [
            "AWS/WorkSpacesThinClient",
            "AWS/Usage"
          ]
        }
      }
    }
  ]
}
```

APIGatewayServiceRolePolicy

Description: Allows API Gateway to manage associated AWS Resources on behalf of the customer.

`APIGatewayServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 20, 2017, 17:23 UTC
- **Edited time:** July 12, 2021, 22:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/APIGatewayServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AppIntegrationsServiceLinkedRolePolicy

Description: Allows AppIntegrations to manage AppFlow resources and publish CloudWatch metric data on your behalf.

`AppIntegrationsServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: September 30, 2022, 19:42 UTC
- **Edited time:** September 30, 2022, 19:42 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AppIntegrationsServiceLinkedRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AuroraDsqlServiceLinkedRolePolicy

Description: Policy for Amazon Aurora DSQL Service Linked Role

`AuroraDsqlServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: December 03, 2024, 15:06 UTC
- **Edited time:** May 09, 2025, 19:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AuroraDsqlServiceLinkedRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "cloudwatch:PutMetricData"
      ],
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "cloudwatch:namespace" : [
            "AWS/AuroraDSQL",
            "AWS/Usage"
          ],
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
      }
    }
  ]
}
```

AWS-SSM-DiagnosisAutomation-OperationalAccountAdministrationRolePolicy

Description: Provides permissions for operational accounts to diagnose unmanaged nodes by providing Organisation specific permissions required by SSM automation to pull the list of member accounts within a root of an Organisation to trigger cross-account cross-region execution by allowing assuming Execution roles in target account/region.

`AWS-SSM-DiagnosisAutomation-OperationalAccountAdministrationRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AWS-SSM-DiagnosisAutomation-OperationalAccountAdministrationRolePolicy` to your users, groups, and roles.

AWS-SSM-RemediationAutomation-OperationalAccountAdministrationRolePolicy

Description: Provides permissions for operational accounts to Remediate unmanaged nodes by providing Organisation specific permissions required by SSM automation to pull the list of member accounts within a root of an Organisation to trigger cross-account cross-region execution by allowing assuming Execution roles in target account/region.

`AWS-SSM-RemediationAutomation-OperationalAccountAdministrationRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AWS-SSM-RemediationAutomation-OperationalAccountAdministrationRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 16, 2024, 00:25 UTC
- **Edited time:** November 16, 2024, 00:25 UTC
- **ARN**: `arn:aws:iam::aws:policy/AWS-SSM-RemediationAutomation-OperationalAccountAdministrationRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AllowReadOnlyAccessOrganization",
      "Effect" : "Allow",
      "Action" : [
        "organizations:ListRoots",
        "organizations:ListChildren"
      ],
      "Resource" : "*"
    },
    {
      "Sid" : "AllowAssumeRemediationExecutionRoleWithinOrg",
      "Effect" : "Allow",
      "Action" : "sts:AssumeRole",
      "Resource" : "arn:aws:iam::*:role/AWS-SSM-RemediationExecutionRole*",
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceOrgId" : "${aws:PrincipalOrgId}"
        }
      }
    }
  ]
}
```

AWS_ConfigRole

Description: Default policy for AWS Config service role. Provides permissions required for AWS Config to track changes to your AWS resources.

`AWS_ConfigRole` is an AWS managed policy.

Using this policy

You can attach `AWS_ConfigRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: September 15, 2020, 20:30 UTC
- **Edited time:** July 28, 2025, 20:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AWS_ConfigRole`

Policy version

Policy version: v39 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.
