What is Amazon Corretto 11?

Amazon Corretto is a no-cost, multiplatform, production-ready distribution of the Open Java Development Kit (OpenJDK). Corretto comes with long-term support that includes performance enhancements and security fixes. Amazon runs Corretto internally on thousands of production services and Corretto is certified as compatible with the Java SE standard. With Corretto, you can develop and run Java applications on popular operating systems, including Linux, Windows, and macOS.

Amazon Corretto 11 is a Long-Term Supported (LTS) distribution of [OpenJDK 11](#)

This guide includes a list of patches applied to OpenJDK for this release of Amazon Corretto 11, and installation instructions for the platforms supported by this version.

Long Term Support (LTS)

LTS includes Amazon's commitment to provide performance enhancements and security updates at no cost until at least the specified date for the relevant release version. Updates are planned to be released quarterly. Amazon also plans to apply urgent fixes (including security) outside of the regular quarterly cycle when they are available and ready to use.

For more information on LTS timelines see the [Corretto support calendar](#)

Related information

In addition to this guide, see the following resources for developers:

- [Amazon Corretto overview](#)
- GitHub:
 - [JDK Source](#)

Contributing to the SDK

Developers can contribute feedback in the following ways:

- Submit issues on GitHub:

- [Report a bug or request a feature](#)
- Submit pull requests in the JDK source GitHub repositories to contribute to the JDK development

List of Patches for Amazon Corretto 11

This section lists all the patches applied to OpenJDK for Amazon Corretto 11. We also provide links to the issues in the OpenJDK project.

Back port from OpenJDK 12, fixing [JDK-8202353](#): "os::readdir should use readdir instead of readdir_r".

Enables compilation on Amazon Linux 2, as `readdir_r` has been deprecated in `glibc >= 2.24`. Additionally, this also fixes [JDK-8202835](#): "`jfr/event/os/TestSystemProcess.java` fails on missing events".

Back port from OpenJDK 12, fixing [JDK-8202794](#): "Native Unix code should use readdir rather than readdir_r".

Enables compilation on Amazon Linux 2, as `readdir_r` has been deprecated in `glibc >= 2.24`.

Back port from OpenJDK 12, fixing [JDK-8207340](#): "UnixNativeDispatcher close and readdir usages should be fixed".

Enables compilation on Amazon Linux 2, as `readdir_r` has been deprecated in `glibc >= 2.24`.

Back port from OpenJDK 12, fixing [JDK-8207748](#): "Fix for 8202794 breaks tier1 builds".

Enables compilation on Amazon Linux 2, as `readdir_r` has been deprecated in `glibc >= 2.24`.

Updates to vendor-related metadata.

Identifies Amazon as the vendor of this OpenJDK distribution and adds hyperlinks for reporting issues.

Amazon Corretto 11 Guide for Linux

The topics in this section describe installation instructions for Amazon Corretto 11 on Linux platforms.

Topics

- [Amazon Corretto 11 Installation Instructions for Debian-Based, RPM-Based and Alpine Linux Distributions](#)
- [Amazon Corretto 11 Installation Instructions for Amazon Linux 2 and Amazon Linux 2023](#)

Amazon Corretto 11 Installation Instructions for Debian-Based, RPM-Based and Alpine Linux Distributions

This topic describes how to install Amazon Corretto 11 on Debian-based, RPM-based and Alpine Linux distributions.

If you need to install Amazon Corretto 11 on Amazon Linux, see [Installing on Amazon Linux](#).

Install Amazon Corretto 11 on Debian-Based Linux

This section describes how to install and uninstall Amazon Corretto 11 on a host or container running a Debian-based operating system.

Using apt

To use the Corretto Apt repositories on Debian-based systems, such as Ubuntu, import the Corretto public key and then add the repository to the system list by using the following commands:

Example

```
wget -O - https://apt.corretto.aws/corretto.key | sudo gpg --dearmor -o /usr/share/keyrings/corretto-keyring.gpg && \
echo "deb [signed-by=/usr/share/keyrings/corretto-keyring.gpg] https://apt.corretto.aws stable main" | sudo tee /etc/apt/sources.list.d/corretto.list
```

After the repo has been added, you can install Corretto 11 by running this command:

Example

```
sudo apt-get update; sudo apt-get install -y java-11-amazon-corretto-jdk
```

For old version Ubuntu such as 14.04, you might encounter error like

Example

```
GPG error: https://apt.corretto.aws stable InRelease: The following signatures couldn't be verified because the public key is not available: NO_PUBKEY A122542AB04F24E3
```

If so, add the public key via:

Example

```
sudo apt-key adv --keyserver hkp://keyserver.ubuntu.com:80 --recv-keys A122542AB04F24E3
```

Download and Install the Debian Package Manually

1. Before you install the JDK, install the `java-common` package.

Example

```
sudo apt-get update && sudo apt-get install java-common
```

2. Download the Linux `.deb` file from the [Downloads](#) page.

3. Install the `.deb` file by using `sudo dpkg --install`. For example install `x86_64 deb` using the following command:

Example

```
sudo dpkg --install java-11-amazon-corretto-jdk_11.0.24.8-1_amd64.deb
```

Verify Your Installation

In the terminal, run the following command to verify the installation.

Example

```
java -version
```

Expected output for 11.0.24:

```
openjdk version "11.0.24" 2024-07-16 LTS
OpenJDK Runtime Environment Corretto-11.0.24.8.1 (build 11.0.24+8-LTS)
OpenJDK 64-Bit Server VM Corretto-11.0.24.8.1 (build 11.0.24+8-LTS, mixed mode)
```

If you see a version string that doesn't mention Corretto, run the following command to change the default java or javac providers.

Example

```
sudo update-alternatives --config java
```

If you're using the JDK, you should also run the following.

```
sudo update-alternatives --config javac
```

Uninstall Amazon Corretto 11

You can uninstall Amazon Corretto 11 by using the following command.

Example

```
sudo dpkg --remove java-11-amazon-corretto-jdk
```

Install Amazon Corretto 11 on RPM-Based Linux

Using yum

To use Corretto RPM repositories with the yum package manager (such as Amazon Linux AMI), import the Corretto public key and then add the repository to the system list. For most systems, you must run the following commands:

Example

```
sudo rpm --import https://yum.corretto.aws/corretto.key
```

```
sudo curl -L -o /etc/yum.repos.d/corretto.repo https://yum.corretto.aws/corretto.repo
```

After the repository is added, you can install Corretto 11 by running this command:

Example

```
sudo yum install -y java-11-amazon-corretto-devel
```

Using zypper

To use Corretto RPM repositories with the zypper package manager (such as openSUSE), import the Corretto public key and then add the repository to the system list by running the following commands:

Example

```
sudo zypper addrepo https://yum.corretto.aws/corretto.repo; sudo zypper refresh
```

After the repository is added, you can install Corretto 11 by running this command:

Example

```
sudo zypper install java-11-amazon-corretto-devel
```

Download and install RPM package manually

1. Download the Linux .rpm file from the [Downloads](#) page.
2. Install the downloaded .rpm file using `yum localinstall`. For example install x86_64 rpm using the following command:

Example

```
sudo yum localinstall java-11-amazon-corretto-devel-11.0.24.8-1.x86_64.rpm
```

Verify Your Installation

In the terminal, run the following command to verify the installation.

Example

```
java -version
```

Expected output for 11.0.24:

```
openjdk version "11.0.24" 2024-07-16 LTS
OpenJDK Runtime Environment Corretto-11.0.24.8.1 (build 11.0.24+8-LTS)
OpenJDK 64-Bit Server VM Corretto-11.0.24.8.1 (build 11.0.24+8-LTS, mixed mode)
```

If you see a version string that doesn't mention Corretto, run the following command to change the default java or javac providers.

Example

```
sudo alternatives --config java
```

If you're using the JDK, you should also run the following.

```
sudo alternatives --config javac
```

Uninstall Amazon Corretto 11

You can uninstall Amazon Corretto 11 by using the following command:

Example

```
sudo yum remove java-11-amazon-corretto-devel
```

Install Amazon Corretto 11 on Alpine Linux

Using Alpine Package Manager

To use Corretto Alpine repositories with the Alpine package manager import the Corretto public key and then add the repository to the system list. For most systems, you must run the following commands:

Example

```
wget -O /etc/apk/keys/amazoncorretto.rsa.pub https://apk.corretto.aws/
amazoncorretto.rsa.pub
```

```
echo "https://apk.corretto.aws/" >> /etc/apk/repositories
apk update
```

After the repository is added, you can install Corretto 11 by running this command:

Example

```
apk add amazon-corretto-11
```

Uninstall Amazon Corretto 11

You can uninstall Amazon Corretto 11 by using the following

Uninstall JDK:

Example

```
apk del amazon-corretto-11
```

Amazon Corretto 11 Installation Instructions for Amazon Linux 2 and Amazon Linux 2023

This topic describes how to install and uninstall Amazon Corretto 11 on a host or container running the Amazon Linux 2 or Amazon Linux 2023 operating systems.

Option 1: Install using the yum Package Manager on Amazon Linux

Amazon Corretto 11 has a 'headless' variant available. This variant omits runtime dependencies that are typically associated with GUI applications such as X11 and ALSA and is worth considering for server-oriented workloads. The 'headful' variant adds support for X11 and ALSA. There is also a 'devel' package which contains the JDK development tools, as well as a 'jmods' package that contains the Amazon Corretto 11 JMods used to create custom runtime images.

Option 1: Install the headless Amazon Corretto 11:

Example

```
sudo yum install java-11-amazon-corretto-headless
```

Option 2: Install the headful Amazon Corretto 11:

Example

```
sudo yum install java-11-amazon-corretto
```

Option 3: Install the JDK for Amazon Corretto 11 (Amazon Linux 2023 only):

Example

```
sudo yum install java-11-amazon-corretto-devel
```

Option 4: Install the JMods for Amazon Corretto 11 (Amazon Linux 2023 only):

Example

```
sudo yum install java-11-amazon-corretto-jmods
```

The installation location is `/usr/lib/jvm/java-11-amazon-corretto.<cpu_arch>`.

Option 2: Download and Install RPMs Manually

1. Download RPMs from the [Downloads](#) page for your CPU architecture. To install the JDK, you will need to download the RPMs for both the JDK and the JRE.
2. Install using `yum localinstall`.

Example

```
sudo yum localinstall java-11-amazon-corretto*.rpm
```

Verify Your Installation

In the terminal, run the following command to verify the installation.

Example

```
java -version
```

Expected output for 11.0.24:

```
openjdk version "11.0.24" 2024-07-16 LTS
OpenJDK Runtime Environment Corretto-11.0.24.8.1 (build 11.0.24+8-LTS)
OpenJDK 64-Bit Server VM Corretto-11.0.24.8.1 (build 11.0.24+8-LTS, mixed mode)
```

If you see a version string that doesn't mention Corretto, run the following command to change the default java or javac providers.

Example

```
sudo alternatives --config java
```

If using the JDK you should also run:

```
sudo alternatives --config javac
```

Uninstall Amazon Corretto 11

You can uninstall Amazon Corretto 11 with the following commands.

Uninstall headless:

Example

```
sudo yum remove java-11-amazon-corretto-headless
```

Uninstall headful:

Example

```
sudo yum remove java-11-amazon-corretto
```

Uninstall devel (Amazon Linux 2023 only):

Example

```
sudo yum remove java-11-amazon-corretto-devel
```

Uninstall jmods (Amazon Linux 2023 only):

Example

```
sudo yum remove java-11-amazon-corretto-jmods
```

Amazon Corretto 11 Guide on Windows

The topics in this section describe installation instructions for Amazon Corretto 11 on the Windows operating system. Windows builds are supported on versions 10 and later, Server 2016, Server 2019, and Server 2022.

Topics

- [Amazon Corretto 11 Installation Instructions for Windows 10 or Later](#)

Amazon Corretto 11 Installation Instructions for Windows 10 or Later

This topic describes how to install and uninstall Amazon Corretto 11 on a host or container running the Windows 10 or later Windows operating system.

Install Amazon Corretto 11

1. Download a Windows .msi file from the [Downloads](#) page.
2. Double-click the .msi file to start the installation wizard.
3. Follow the steps in the wizard.

You have the option of setting a custom installation path. By default, Amazon Corretto 11 is installed at C:\Program Files\Amazon Corretto\. If you set a custom path, make a note of it for the next step.

4. Once the install wizard is finished, set the JAVA_HOME and PATH environment variables.

Set JAVA_HOME to the installation location, noting that the directory contains the currently-installed version. For example, if the default directory is used for 11.0.24, then set JAVA_HOME as C:\Program Files\Amazon Corretto\jdk11.0.24_8.

Add %JAVA_HOME%\bin to the current PATH variable.

5. Verify the installation by running **java -version** in a command prompt. You should see the following output.

Example

```
openjdk version "11.0.24" 2024-07-16 LTS
OpenJDK Runtime Environment Corretto-11.0.24.8.1 (build 11.0.24+8-LTS)
OpenJDK 64-Bit Server VM Corretto-11.0.24.8.1 (build 11.0.24+8-LTS, mixed mode)
```

Uninstall Amazon Corretto 11

You can uninstall Amazon Corretto 11 by following the standard steps to uninstall an application from Windows.

1. Open **Programs and Features**.
2. Search for **Amazon Corretto 11** and then select it.
3. Choose **uninstall**.

Amazon Corretto 11 Guide for macOS

The topics in this section describe installation instructions for Amazon Corretto 11 on macOS.

Topics

- [Amazon Corretto 11 Installation Instructions for macOS 11 or later](#)

Amazon Corretto 11 Installation Instructions for macOS 11 or later

This topic describes how to install and uninstall Amazon Corretto 11 on a host running the Mac OS version 11 or later. You must have administrator permissions to install and uninstall Amazon Corretto 11.

Install Amazon Corretto 11

1. Download the Mac .pkg file from the [Downloads](#) page.
2. Double-click the downloaded file to begin the installation wizard and follow the steps in the wizard.
3. Once the wizard completes, Amazon Corretto 11 is installed in `/Library/Java/JavaVirtualMachines/`.

You can run the following command in a terminal to get the complete installation path.

Example

```
/usr/libexec/java_home --verbose
```

4. Run the following command in the terminal to set the `JAVA_HOME` variable to the Amazon Corretto 11 version of the JDK. If this was set to another version previously, it is overridden.

Example

```
export JAVA_HOME=/Library/Java/JavaVirtualMachines/amazon-corretto-11.jdk/Contents/Home
```

Uninstall Amazon Corretto 11

You can uninstall Amazon Corretto 11 by running the following commands in a terminal.

Example

```
cd /Library/Java/JavaVirtualMachines/  
sudo rm -rf amazon-corretto-11.jdk
```

Amazon Corretto 11 Guide for Docker

This section describes simple use cases for using Amazon Corretto 11 in Docker containers.

Topics

- [Getting Started with Amazon Corretto 11 on Docker Images](#)

Getting Started with Amazon Corretto 11 on Docker Images

This topic describes how to build and launch a Docker image that uses Amazon Corretto 11. You must have the latest version of Docker installed.

Using the official image for Amazon Corretto 11.

Amazon Corretto 11 is available as an [official image on Docker Hub](#). The following example runs a container and displays Corretto 11's version.

Example

```
docker run amazoncorretto:11 java -version
```

Output:

Example

```
openjdk version "11.0.24" 2024-07-16 LTS
OpenJDK Runtime Environment Corretto-11.0.24.8.1 (build 11.0.24+8-LTS)
OpenJDK 64-Bit Server VM Corretto-11.0.24.8.1 (build 11.0.24+8-LTS, mixed mode)
```

Using the Corretto ECR Instance

Note

The Corretto ECR Private Registry located at 489478819445.dkr.ecr.us-west-2.amazonaws.com/amazoncorretto is now deprecated. Please migrate existing usages to the [Corretto ECR Public Gallery](#). See [corretto-docker#154](#) for more information.

To use the Corretto ECR instance, run the following commands:

Example

```
docker pull public.ecr.aws/amazoncorretto/amazoncorretto:11
docker run -it public.ecr.aws/amazoncorretto/amazoncorretto:11 /bin/bash
```

You can see the list of available images by going [here](#):

Amazon Corretto on Alpine

Amazon Corretto on Alpine Linux images are available on [Amazon ECR Public Gallery](#) and [Dockerhub](#)

Using dockerhub

Example

```
docker pull amazoncorretto:11-alpine-jdk
docker run -it amazoncorretto:11-alpine-jdk /bin/sh
```

Build a Docker Image with Amazon Corretto 11

Run the following command to build an image that uses Amazon Corretto 11.

Example

```
docker build -t amazon-corretto-11 github.com/corretto/corretto-docker#main:11/jdk/
al2023
```

After the command completes, you have an image called *amazon-corretto-11*.

To launch this image locally, run the following command.

Example

```
docker run -it amazon-corretto-11
```

You can also push this image to Amazon ECR. See the [Pushing an Image](#) topic in the *Amazon Elastic Container Registry User Guide* for details.

Create an Image

You can create a new Docker image using [Corretto's official Docker Hub image](#).

1. Create a Dockerfile with the following content.

Example

```
FROM amazoncorretto:11
RUN echo $' \
public class Hello { \
public static void main(String[] args) { \
System.out.println("Welcome to Amazon Corretto!"); \
} \
}' > Hello.java
RUN javac Hello.java
CMD ["java", "Hello"]
```

2. Build the new image.

Example

```
docker build -t hello-app .
```

3. Run the new image.

Example

```
docker run hello-app
```

You get the following output.

```
Welcome to Amazon Corretto!
```

Downloads for Amazon Corretto 11

This topic lists all the downloads available for Amazon Corretto 11. You can choose Permanent URLs pointing to the latest version, or use Version Specific URLs which point to a specific version.

Amazon Corretto 11 Permanent URLs

Permanent URLs always point to the most recent release of a package. For example, to retrieve the latest Linux Corretto 11 .tgz package by using a Permanent URL, run the following command from the CLI:

Example

```
wget https://corretto.aws/downloads/latest/amazon-corretto-11-x64-linux-jdk.tar.gz
```

You can also run the following curl command.

Example

```
curl -LO https://corretto.aws/downloads/latest/amazon-corretto-11-x64-linux-jdk.tar.gz
```

Note: Permanent URL's are redirected (HTTP 302) to actual artifact's URL.

These links can be used in scripts to pull the latest version of Amazon Corretto 11.
